Project Japan Metabolism Talks:

Project Japan Rem Koolhaas, Hans-Ulrich Obrist, 2011 Metabolism was a movement launched in Japan that took inspiration for buildings and cities from biological systems With interviews and commentary and hundreds of images Project Japan unearths a history that casts new light on the key issues that both enervate and motivate architecture today

Project Japan Rem Koolhaas, Hans-Ulrich Obrist, Kayoko Ota, 2011 Project Japan Rem Koolhaas, Hans Ulrich Obrist, Kayoko Ota, James Westcott, 2011 Metabolism was a movement launched in Japan that took inspiration for buildings and cities from biological systems With interviews and commentary and hundreds of images Project Japan unearths a history that casts new light on the key issues that both enervate and motivate architecture today *As Seen* Zoë Ryan, 2017-01-01 Exhibitions have long played a crucial role in defining disciplinary histories This fascinating volume examines the impact of eleven groundbreaking architecture and design exhibitions held between 1956 and 2006 revealing how they have shaped contemporary understanding and practice of these fields Featuring written and photographic descriptions of the shows and illuminating essays from noted curators scholars critics designers and theorists *As Seen Exhibitions that Made Architecture and Design History* explores the multifaceted ways in which exhibitions have reflected on contemporary dilemmas and opened up new processes and ways of working Providing a fresh perspective on some of the most important exhibitions of the 20th century from America Europe and Japan including This Is Tomorrow Expo 70 and Massive Change this book offers a new framework for thinking about how exhibitions can function as a transformative force in the field of architecture and design Seoul Rafael Luna, 2024-04-30 This book focuses on understanding how a megacity like Seoul can be read as a formal architectural composition and not an endless urban sprawl In a broader sense the book discusses the dichotomy between city and urbanization city being an architectural problem of bounded forms while urbanism is an infrastructural project of expansion It is an uncontested reality that urbanization is a continuous global process that has produced nebulous conurbations labeled as megacities These expand beyond the virtual administrative boundary of any said city producing a discrepancy between an area of administrative control and the real physical condition of human settlement If there were a better formal understanding of megacities through their typological architectural conditions then there could be a better assessment of the qualitative state of urbanization Avant garde groups from the 1950s 1960s and 1970s such as Team X the Situationist the Structuralist and the Metabolist worked with ideas of megaforms and megastructures to address this issue Although most of these proposals remained as paper architecture this book reevaluates some of these ideas for the 21st century megacity using Seoul as a case study due to its clear typological formations produced over its different periods of governance The aim is to present the concept for an infra architectural hybrid model of typological islands and subterranean megastructure that organizes Seoul as a flexible multi linear city This book will be of interest to academics and students of architecture urban geography and Asian studies **Setting the Scene** Alistair Fair, 2016-03-03 During the twentieth

century an increasingly diverse range of buildings and spaces was used for theatre Theatre architecture was re formed by new approaches to staging and performance while theatre was often thought to have a reforming role in society Innovation was accompanied by the revival and reinterpretation of older ideas The contributors to this volume explore these ideas in a variety of contexts from detailed discussions of key architects work including Denys Lasdun Peter Moro Cedric Price and Heinrich Tessenow to broader surveys of theatre in West Germany and Japan Other contributions examine the Malm Stadsteater ideal theatres in post war North America found space in 1960s New York and Postmodernity in 1980s East Germany Together these essays shed new light on this complex building type and also contribute to the wider architectural history of the twentieth century

Contemporary Japanese Architecture James Steele,2017-03-16 Contemporary Japanese Architecture presents a clear and comprehensive overview of the historical and cultural framework that informs the work of all Japanese architects as an introduction to an in depth investigation of the challenges now occupying the contemporary designers who will be the leaders of the next generation It separates out the young generation of Japanese architects from the crowded distinguished multi generational field they seek to join and investigates the topics that absorb them and the critical issues they face within the new economic reality of Japan and a shifting global order Salient points in the text are illustrated by beautiful descriptive images provided by the architects and from the extensive collection of the author By combining illustrations with timelines and graphics to explain complex ideas the book is accessible to any student seeking to understand contemporary Japanese architecture

Reading Kenneth Frampton Gevork Hartoonian,2022-05-10 This book focuses on the first edition of Kenneth Frampton s Modern Architecture A Critical History published in 1980 It searches for clues and positions that will provide the reader with an unprecedented insight into the significance of Frampton s historiography of modern architecture It explores selected themes in line with Frampton s many faceted contribution certain aspects of which can be noted between the lines of his ongoing criticism of the present day architecture which inevitably lead us to a critical understanding of the past the modernity of architecture s contemporaneity The compiled chapters attempt to open a window onto the constellation of themes that allowed Frampton to hold on to his anteroom view of history even amidst the flow of time and flood of temporalities spanning 1980 2020 The book elucidates how Frampton s critical presentation of the history of modern movement architecture and the book s classificatory mode periodization contribute to our understanding of the contemporaneity of architecture today

2018 Günter Berghaus,Domenico Pietropaolo,Beatrice Sica,2018-04-09 The eighth volume of the International Yearbook of Futurism Studies is again an open issue and presents in its first section new research into the international impact of Futurism on artists and artistic movements in France Great Britain Hungary and Sweden This is followed by a study that investigates a variety of Futurist inspired developments in architecture and an essay that demonstrates that the Futurist heritage was far from forgotten after the Second World War These papers show how a wealth of connections linked Futurism with Archigram Metabolism Archizoom and

Deconstructivism as well as the Nuclear Art movement Spatialism Environmental Art Neon Art Kinetic Art and many other trends of the 1960s and 70s The second section focuses on Futurism and Science and contains a number of papers that were first presented at the fifth bi annual conference of the European Network for Avant Garde and Modernism Studies EAM held on 13 June 2016 in Rennes They investigate the impact of science on Futurist aesthetics and the Futurist quest for a new perception and rational understanding of the world as well as the movement's connection with the esoteric domain especially in the field of theosophy the Hermetic tradition Gnostic mysticism and a whole phalanx of Spiritualist beliefs The Archive section offers a survey of collections and archives in Northern Italy that are concerned with Futurist ceramics and a report on the Fondazione Primo Conti in Fiesole established in April 1980 as a museum library and archive devoted to the documentation of the international avant garde and to Italian Futurism in particular A review section dedicated to exhibitions conferences and publications is followed by an annual bibliography of international Futurism studies exhibition catalogues special issues of periodicals and new editions

Pyrotechnic Cities Liam Ross, 2022-06-24 This book explores the relationship between architecture government and fire It posits that through the question of fire safety standardisation building design comes to be both a problem for and a tool of government Through a close study of fire safety standards it demonstrates the shaping effect that architecture and the city have on the way we think about governing Opening with an investigation into the Grenfell Tower fire and the political actors who sought to enrol it in programmes of governmental reform before contextualising the research in current literature the book takes four city studies each beginning with a specific historic fire The 1654 Great Fire of Meirecki Edo the 1877 town fire of Lagos the 1911 Empire Palace Theatre fire Edinburgh and the 2001 World Trade Centre attack New York Each study identifies the governmental response to the fire safety standards and codes designed in its wake and how these new processes spread and change Drawing on the work of sociologists John Law and Anne Marie Mol and their concept of Fire Space it describes the way that architectural design through the medium of fire is an instrument of political agency Pyrotechnic Cities is a critical investigation into these political implications written for academics researchers and students in architectural history and theory infrastructure studies and governance

Contemporary Perspectives on Architectural Organicism Gary Hua fan He, Skender Luarasi, 2023-06-07 This project is born out of similar questions and discussions on the topic of organicism emergent from two critical strands regarding the discourse of organic self generation one dealing with the problem of stopping in the design processes in history and the other with the organic legacy of style in the nineteenth century as a preeminent form of aesthetic ideology The epistemologies of self generation outlined by enlightenment and critical philosophy provided the model for the discursive formations of modern urban planning and architecture The form of the organism was thought to calibrate modernism s infinite extension The architectural organicism of today does not take on the language of the biological sciences as they did in the nineteenth and twentieth centuries but rather the image of complex systems be they computational informational geo ecological or even ontological aesthetic networks What is retained from the modernity of yesterday is the ideology of endless self generation Revisiting such a topic feels relevant now in a time when the idea of endless generation is rendered more suspect than ever amid an ever increasing speed and complexity of artificial intelligence AI networks The essays collected in this book offer a variety of critiques of the modernist idea of endless growth in the fields of architecture literature philosophy and the history of science They range in scope from theoretical and speculative to analytic and critical and from studies of the history of modernity to reflections of our contemporary world Far from advocating a return to the romantic forms of nineteenth century naturphilosophie this project focuses on probing organicism for new forms of critique and emergent subjectivities in a contemporary post pandemic constellation of neo naturalism in design climate change complex systems and information networks This book will be of interest to a broad range of researchers and professionals in architecture and art history historians of science visual artists and scholars in the humanities more generally

Reckoning with Colin Rowe Emmanuel Petit, 2015-02-20 While the first half of the 20th century in architecture was to a large extent characterized by innovations in aesthetics accompanied by succinct and polemical manifestoes the post war decades saw emerge a more refined and intellectual disciplinary framework that eventually metamorphosed into the highly theory focused moment of the postmodern Colin Frederick Rowe 1920 1999 was a leader of this epistemic shift due to his aptitude to connect his historical and philosophical erudition to the visual analysis of

architecture This book unites ten different perspectives from architects whose lives and ideas intersected with Rowe's including Robert Maxwell Anthony Vidler Peter Eisenman O Mathias Ungers Leon Krier Rem Koolhaas Alan Colquhoun Robert Slutzky Bernhard Hoesli Bernard Tschumi With an introduction by Emmanuel Petit and a postscript by Jonah Rowen In their critical assessment of a key 20th century formalist these renowned architects reflect on how their own positions came to diverge from Rowe's Reckoning with Colin Rowe is a thought provoking discussion of key schools places concepts and people of architectural theory since the post war years illustrated with over forty beautiful black and white drawings and photographs
