Presidents vs Aliens is a tablet game by Dan-Russell Pinson where you answer questions about US Presidents to knock down a swarm of aliens. You must get the question correct in order to load up the President, then you aim at where you want to shoot him by dragging your finger across the screen in the direction you want to go. The level is over when all the aliens are knocked out of the sky, and when you win you gain a President to add to your collection. However, you only collect a President when you get 50% or more of the questions right.

Teachers across the globe are using Minecraft as a learning resource. Students say that with something interactive and fun, something they can understand, it helps make the math understandable, too. Some teachers found ways to teach History in Minecraft, by having their students recreate Roman cities, or build complex structures in survival mode. They have their student's log onto a computer and build, or the teacher projects a screen onto the board and teaches that way. I think this is the right approach towards students getting higher grades, and most importantly, having fun in school.
