Licensing for personal trainers: legitimizing the profession. "In its present form, personal training only dates back a few decades, yet it is among the fastest growing professions in the U. S. " (Holt). In the 80's and 90's personal trainers were predominantly heavy lifters who looked like they could soon compete in a bodybuilding contest. The muscular physique automatically qualified each of them as "guru" in the fitness world and helped quickly build a clientele.

Towards the late-90's, the situation started to change: gyms became less and less of an intimidating environment for a wide category of people with no desire to become "huge. " Personal trainers of a new generation expanded their specialization to weight loss, cardio vascular health, toning and general fitness which made training itself more accessible for all age groups, people with different skill levels and special requirements. As a result, the trainer's job today has become very complex and goes much farther instructions during a workout session.

It can't be successfully performed without a strong knowledge of anatomy, kinesiology, program development and even psychology. You will assume that someone who guides and assists you in developing health and fitness must be a specialist in this area of knowledge. Of course! But do you know that one can become "a certified personal trainer" by taking an online test for less than 100 dollars? It's true! Competence and skill level of many trainers you see at health clubs and gyms is low and they are surely not worth the money spent.

Moreover, your health is under potential risk! The solution to this problem can be achieved through a required licensing of personal trainers just like other health/medical professionals. This would benefit both the public and the personal training profession. As a fitness trainer for over seven years, I truly believe that our industry desperately needs more regulations. My background in gymnastics in addition to two certifications from Wellness Academy (Russia) and International Sports Science Association (USA) surely give me a big advantage over someone who spent \$69.95 and a couple weeks learning "all the nitty-gritty of personal training" to obtain so called ExpertRating Online Certification (Personal Training Certification).

So you may think: the less my competitors know the better my services look in comparison with their. No, it's not that easy! I would rather have a strong competition than constantly disprove common opinion about personal trainers as people with weak knowledge base who flirt with clients, bark orders and very often behave unprofessionally.

A few times I trained people who had bad experience with a trainer in the past and it felt like I had to break the wall of apprehension and distrust before they took me seriously. Not only I had to defend myself in some ways but there were also financial consequences whe

The Making of Arguments J.H Gardiner, 2020-07-28 Reproduction of the original The Making of Arguments by J H Gardiner

The Imaginative Argument Frank L. Cioffi, 2017-12-11 More than merely a writing text The Imaginative Argument offers writers instruction on how to use their imaginations to improve their prose Cioffi shows writers how they can enliven argument the organizing rubric of all persuasive writing by drawing on emotion soul and creativity the wellsprings of imagination While Cioffi suggests that argument should become a natural habit of mind for writers he goes still further inspiring writers to adopt as their gold standard the imaginative argument the surprising yet strikingly apt insight that organizes disparate noises into music that makes out of chaos chaos theory Rather than offering a model of writing based on established formulas or templates Cioffi urges writers to envision argument as an active parsing of experience that imaginatively reinvents the world Cioffi s manifesto asserts that successful argument also requires writers to

explore their own deep seated feelings to exploit the fuzzy but often profoundly insightful logic of the imagination But expression is not all that matters Cioffi s work anchors itself in the actual Drawing on Louis Kahn s notion that a good architect never has all the answers to a building s problems before its physical construction Cioffi maintains that in argument too answers must be forged along the way as the writer inventively deals with emergent problems and unforeseen complexities Indeed discovery imagination and invention suffuse all stages of the process The Imaginative Argument offers all the intellectual kindling that writers need to ignite this creativity from insights on developing ideas to avoiding bland assertions or logical leaps It cites exemplary nonfiction prose stylists including William James Ruth Benedict and Erving Goffman as well as literary sources to demonstrate the dynamic of persuasive writing Provocative and lively it will prove not only essential reading but also inspiration for all those interested in arguing more imaginatively more successfully This edition features new chapters that cover the revision process in greater depth as well as the particular challenges of researching and writing in the digital age such as working with technology and avoiding plagiarism The book also includes new sample essays an appendix to help instructors use the book in the classroom and much more

The Philosophy of the Young Kant Martin Schonfeld,2000-10-12 This intellectual biography of Immanuel Kant s early years from 1746 when he wrote his first book to 1766 when he lost his faith in metaphysics makes an outstanding contribution to Kant scholarship Schonfeld meticulously examines most of Kant s early works summarizes their content and exhibits their shortcomings and strengths He places the early theories in their historical context and describes the scientific discoveries and philosophical innovations that distinguish Kant s pre critical works Schonfeld argues that these works were all aspects of a single project carried out by Kant to reconcile metaphysical and scientific perspectives and combine them into a coherent model of nature
