Qualitative Analysis of Anions

Purpose of the Experiment

This lab introduces qualitative analysis, the area of chemistry concerned with the identification of substances by their chemical reactions. You will observe the reactions of some simple salts, and identify unknown samples. This experiment also provides a review of acid-base chemistry, introduces oxidation-reduction reaction and complex ion formation.

Introduction

Identifying samples of unknown substances is an important part of chemistry, with applications in medicine, environmental science, and geology. Materials can be characterized by both observing their characteristic chemical reactions, and by using instrumental analysis. Often identification of substances by their typical reactions is simple, accurate, and inexpensive, in comparison to instrumental methods. In this lab you will observe some characteristic reactions of six negatively charged ions (anions). Your observations of carbonate (CO_3^{2-}), bicarbonate (HCO_3^-), sulfite (SO_3^{2-}), sulfate (SO_4^{2-}), chloride (Cl^-), and iodide (I^-) reactions will then help you to identify unknown samples.

Anion Reactions

The chemical reactions that you will observe in the lab videos will allow you to witness the behavior of salts of known composition with a number of reagents. Then you will determine which anion is present in each of the unknown samples assigned to you. For this lab, the anions are separated into three main classification groups:

Group 1 Affected by addition of dilute hydrochloric acid	Group 2 Affected by the addition of concentrated sulfuric ² acid	Group 3 Precipitate with barium chloride
Carbonate (CO_3^{2-})	Chloride (Cl^-)	Sulfate (SO_4^{2-})
Bicarbonate (HCO_3^-)	Bromide (Br^-)	Phosphate (PO_4^{3-})
Sulfite (SO_3^{2-})	Iodide (I^-)	
Sulfide (S^{2-})	Nitrate (NO_3^-)	
Nitrite (NO_2^-)		
Thiosulfate (SCN^-)		

Group 1 anions are all affected by the addition of dilute hydrochloric acid since they are all anions of weak acids. The Group 2 anions result in the formation of volatile products when a strong acid is added, and the Group 3 anions result in the formation of insoluble barium salts upon the addition of BaCl_2 . There will be additional confirmation experiments for each of these anions as well.

² The British English spelling of sulfuric acid is sulphuric acid; similarly sulfate can also be written as sulphate; sulfite can be sulphite; and thiosulfate as thiosulphate. The IUPAC spelling is sulfate, sulfuric acid, etc.

Laboratory Manual for Principles of General Chemistry Jo Allan Beran, 2010-11-01 This new edition of the Beran lab manual emphasizes chemical principles as well as techniques The manual helps students understand the timing and situations for the various techniques The Beran lab manual has long been a market leading lab manual for general chemistry Each experiment is presented with concise objectives a comprehensive list of techniques and detailed lab intros and step by step procedures

Laboratory Manual for Principles of General Chemistry J. A. Beran, Mark Lassiter, 2022-08-16
Laboratory Manual for Principles of General Chemistry 11th Edition covers two semesters of a general chemistry laboratory program The material focuses on the lab experiences that reinforce the concepts that not all experimental conclusions are the same and depend on identifying an appropriate experimental procedure selecting the proper apparatus employing the proper techniques systematically analyzing and interpreting the data and minimizing inherent variables As a result of good data a scientific and analytical conclusion is made which may or may not be right but is certainly consistent with the data Experiments write textbooks textbooks don't write experiments A student's scientific literacy grows when experiences and observations associated with the scientific method are encountered Further experimentation provides additional cause effect observations leading to an even better understanding of the experiment The 11th edition's experiments are informative and challenging while offering a solid foundation for technique safety and experimental procedure The reporting and analysis of the data and the pre and post lab questions focus on the intuitiveness of the experiment The experiments may accompany any general chemistry textbook and are compiled at the beginning of each curricular unit An Additional Notes column is included in each experiment's Report Sheet to provide a space for recording observations and data during the experiment Continued emphasis on handling data is supported by the Data Analysis section
