Albert Shaw, 1891    **The Review of Reviews** Albert Shaw, 1891    Between Science and Religion Phillip M. Thompson, 2009-08-15 In exploring the role of Catholic intellectuals in engaging science and technology in the twentieth century this book initially provides a background context for this evolution by examining the Modernism crisis in the first chapter. In order to unpack the subsequent evolution Thompson then concentrates in separate chapters on the distinctive contributions of four specific Catholic intellectuals Jacques Maritain 1882-1973 Pierre Teilhard de Chardin 1881-1955 Bernard Lonergan 1904-1984 and Thomas Merton 1915-1968 All of these intellectuals experienced some degree of official restraint in their efforts but through their distinctive intellectual trajectories they contributed to a different engagement of the Church with science and technology. In the final chapters the book first reviews the changes within the institutional Church in the twentieth century toward science and technology. Finally it then applies some key ideals of the four intellectuals to anneal and extend John Paul II's approach of critical openness to suggest how the Church can now engage science and technology.

**Educational Times**, 1887    **Collected Papers of Carl Wieman** Carl E. Wieman, 2008 Carl Wieman's contributions have had a major impact on defining the field of atomic physics as it exists today. His ground breaking research has included precision laser spectroscopy using lasers and atoms to provide important table top tests of theories of elementary particle physics, the development of techniques to cool and trap atoms using laser light particularly in inventing much simpler less expensive ways to do this, the understanding of how atoms interact with one another and light at ultracold temperatures and the creation of the first Bose Einstein condensation in a dilute gas and the study of the properties of this condensate. In recent years he has also turned his attention to physics education and new methods and research in that area. This indispensable volume presents his collected papers with annotations from the author tracing his fascinating research path.
