

Surface Area of a Cone

The **surface area of a cone** is the area which covers the outer surface of the cone.

In order to calculate the total surface area of a cone we need to find the area of the two parts of the surface of the cone and add them together. There is a curved surface area and a circular base.

$$\text{TOTAL surface area} = \pi r l + \pi r^2$$

IEPs and CCSS: Specially Designed Instructional Strategies Toby Karten, 2013-01-01

The Common Core State Standards which have been adopted in most states in the country delineate the skills and knowledge that students are expected to possess at each grade level K 12 in order to be college and career ready CCR by the time they graduate high school

They are designed to ensure that ALL American students including students with disabilities receive a high quality education that positions them for lifelong success

In IEPs CCSS Specially Designed Instructional Strategies author Toby Karten presents a variety of specially designed instructional strategies and interventions that teachers and IEP team members can use to connect the individualized education programs IEPs of students with disabilities to the Common Core State Standards CCSS

This six page tri fold laminated guide offers a side by side outline of the required components of an IEP and the criteria for instruction according to the CCSS

Karten explains that when developing a student s IEP the IEP team should include both individualized goals the behaviors skills tasks the student is expected to learn and the grade level standards of the CCSS

The guide offers

examples of accommodations and instructional supports to include in a student's IEP to help him/her meet IEP goals as well as math and literacy standards. Specially designed instruction may include among other things the involvement of additional service providers, instructional strategies based on universal design for learning (UDL) principles, assistive technology devices and services incorporating the student's interests and strengths. Five scenarios are provided to demonstrate a variety of ways instruction can be individualized for students with specific classifications, strengths and interests.
