Descriptive Adaptation Studies Patrick Cattrysse ,2014-02-18 It is common practice nowadays for adaptation critics to denounce the lack of meta theoretical thinking in adaptation studies and to plead for a study of adaptation as adaptation one that eschews value judgments steps beyond normative fidelity based discourse examines adaptation from an intertextual perspective and abandons the single source model for a multiple source model This study looks into a research program that does all that and more It was developed in the late 1980s and presented in the early 1990s as a polysystem PS study of adaptations Since then the PS label has been replaced with descriptive This book studies the question of whether and how a PS approach could evolve into a descriptive adaptation studies DAS approach Although not perfect no method is DAS offers a number of assets Apart from dealing with the above mentioned issues DAS transcends an Auteurist approach and looks at explanation beyond the level of individual agency even if contextualized As an alternative to the endless accumulation of ad hoc case studies it suggests corpus based research into wider trends of adaptational behavior and the roles and functions of sets of adaptations DAS also allows reflection upon its own epistemic values It sheds new light on some old issues How can one define adaptation What does it mean to study adaptation as adaptation Is equivalence still possible and is the concept still relevant DAS also tackles some deeper epistemological issues How can phenomena be compared Why would difference be more real than sameness or change more real than stasis How does description relate to evaluation explanation and prediction etc This book addresses both theory minded scholars who are interested in epistemological reflection and practice oriented adaptation students who want to get started From a theoretical point of view it discusses arguments that could support the legitimacy of adaptation studies as an academic discipline From a practical point of view it explains in general terms ways of conducting an adaptation study Patrick Cattrysse s work is of utmost importance to Adaptation Studies As the

first extended attempt to develop a rigorous methodology which borrows in very meaningful ways from Adaptation Studies cousin Translation Studies this book should be on every Adaptation scholar's shelf While Hutcheon's Sanders and Leitch to name but a few laid the groundwork which allowed Adaptation Studies to establish itself as a field of inquiry in its own right Cattrysse moves the field into the next necessary stage that of developing conceptual tools which stand the test of critical investigation and allow Adaptation Studies to move beyond the single case study approach Katja Krebs University of Bristol This book is a bold initiative it proposes and illustrates a comprehensive new empirical research programme for film adaptation studies inspired by the way systems theory and norm theory have expanded Translation Studies One of the book's unusual strengths is the way the proposal is grounded in a thoughtful theoretical discussion of conceptual and methodological issues dealing with such notions as theory descriptivism definition diachrony and explanation This gives the work a significance that ranges well beyond Adaptation Studies alone it deserves the attention of scholars in the humanities in general Andrew Chesterman University of Helsinki This dense and theoretically informed study argues forcefully for a descriptive systems analysis approach to literature film adaptation building on the author's earlier corpus based study of film noir and adaptation Providing a wide ranging discussion of important critical questions including the place of logical positivism in humanistic studies this book will give adaptation scholars much to think about Well written carefully organized and consistently persuasive DESCRIPTIVE ADAPTATION STUDIES promises to be an important intervention in a field of increasing importance in humanistic studies Must reading for scholars in the field R Barton Palmer Clemson University

Reception Studies and Adaptation Giulia Magazzù, Valentina Rossi, Angela Sileo, 2020-07-22 Offering compelling insights into the Italian adaptation of diversified English products this volume is addressed to both scholars and students wishing to delve into the field of reception studies It focuses on literary multimedia and audiovisual translation due to the conviction that the modalities through which the imprinting of Italianness is marked upon several English hypertexts are still worth investigating today The contributions here highlight how some choices may in some instances alter the meaning as much as the success of some English aesthetic texts by directing if not possibly undermining the audience reception Emotion and Adaptation Richard S. Lazarus, 1994-06-09 In this landmark work Richard Lazarus one of the world's foremost authorities offers a comprehensive treatment of the psychology of emotion its role in adaptation and the issues that must be addressed to understand it The work provides a complete theory of emotional processes explaining how different emotions are elicited and expressed and how the emotional range of individuals develops over their lifetime The author's approach puts emotion in a central role as a complex patterned organic reaction to both daily events and long term efforts on the part of the individual to survive flourish and achieve In his view emotions cannot be divorced from other functions whether biological social or cognitive and express the intimate personal meaning of what individuals experience As coping and adapting processes they are seen as part of the ongoing effort to monitor changes stimuli and stresses arising from the environment After defining

emotion and discussing issues of classification and measurement Lazarus turns to the topics of motivation cognition and causality as key concepts in this theory Next he looks at individual emotions both negative and positive and examines their development in terms of social influences and individual events Finally he considers the long term consequences of emotion on physical health and well being and the treatment and prevention of emotional dysfunction The book draws together the relevant research from a wide variety of sources and distills the author s pioneering work in the field over the last forty years As a comprehensive treatment of the emotions the book will interest students clinicians and researchers involved in personality social and clinical psychology as well as cognitive and developmental psychology It may also be used as a supplemental textbook in courses on the psychology of adjustment emotion and feeling

Transformational Public Policy Mark Matthews, 2016-06-10 Transformational Public Policy examines how governments can more effectively handle uncertainty and risk in an uncertain and changing world Unpredictable and changing circumstances often bring nasty surprises that can increase waste in governance and public debt This book illustrates how new methods derived from signal processing techniques can improve the practice of public policy by transforming it through rapid learning and adaptation Interventions are processes of discovery not compliance Transformational Public Policy shows readers how the power of hypothesis testing in governance can be deployed The book argues that public policy can be framed as tests of competing hypotheses subject to diagnostic errors The aim is to learn how to reduce these diagnostic errors through cumulative experience This approach can reduce the impact of negative unintended consequences a topic of great interest to policy makers and academics alike

Social Media, Work and Organisations Claire Taylor, 2024-11-28 Social media use is a confounding aspect of organisations aiding interconnection communication and productivity Its use has undoubtedly impacted on human resource management and the establishment of harmonious contemporary employment relationships Its use challenges the traditional boundaries which existed between work and privacy and in doing so seemingly increases organisational power and management control This book discusses the impact social media has on work how it is used to stage the organisation self identity power and control using four conceptual themes adoption shaping and staging of social media in organisations digitised regimes of power control and surveillance evolving identity employee voice and dramaturgical performance online and employee forms of resistance sousveillance and social media misbehaviours These themes are brought to life through the lived experiences and narratives of workers who hold roles in human resources management and frontline operations This approach highlights a unique multi perspective on social media use by giving voice to these workers The book uses these individual narratives to reposition the ways employees utilise social media for sousveillance dissent and resistance purposes In doing so the book encourages wider debate critical reflection and self reflexivity on rarely discussed management approaches or mis behaviours associated with social media use and their profound implications for power dynamics in organisations

Language Adaptation Florian Coulmas, 1989 Language Adaptation examines the process by which a speech community is forced to adopt an active role in making its language suitable for changing functional requirements This wide ranging collection of essays looks at this phenomenon from a variety of historical and synchronic perspectives and brings together the work of a number of leading scholars in the field Several different languages are examined at different stages of their history including Hebrew Arabic Chinese Japanese Kiswahili German and Hindi This well informed book is a significant contribution to the existing literature on language planning and is the first to use one theoretical concept to deal with the relationship between natural and

deliberate language change It shows that language adaptation is a particular aspect of language change and thus establishes a link between the social and the historical study of language It will appeal to graduate students and professionals in linguistics and the social sciences as well as to practitioners of language planning Music as a Spandrel of Evolutionary Adaptation for Speech Gregor Tomc,2023-07-14 Some forms of human behavior make no sense in the light of evolution Music is one of them and it is the main subject of this book Here it is interpreted from a holistic perspective music is embedded in our nature it is embodied in our organisms and it is emergent a language that opens the doors of imagination for us The first half of the book is dedicated to cognitive aspects of acoustic signalization of learned bird song of automatic mammal calls and of speech and music in humans The second part of the books deals with the culture of music in European modernity The question of the relation of music and imagination is also addressed The book posits that music makes it easier for us to depart from paramount reality and become creative not bad for something that started as a spandrel of speech

Democratizing Innovation Eric Von Hippel,2006-02-17 The process of user centered innovation how it can benefit both users and manufacturers and how its emergence will bring changes in business models and in public policy Innovation is rapidly becoming democratized Users aided by improvements in computer and communications technology increasingly can develop their own new products and services These innovating users both individuals and firms often freely share their innovations with others creating user innovation communities and a rich intellectual commons In Democratizing Innovation Eric von Hippel looks closely at this emerging system of user centered innovation He explains why and when users find it profitable to develop new products and services for themselves and why it often pays users to reveal their innovations freely for the use of all The trend toward democratized innovation can be seen in software and information products most notably in the free and open source software movement but also in physical products Von Hippel s many examples of user innovation in action range from surgical equipment to surfboards to software security features He shows that product and service development is concentrated among lead users who are ahead on marketplace trends and whose innovations are often commercially attractive Von Hippel argues that manufacturers should redesign their innovation processes and that they should systematically seek out innovations developed by users He points to businesses the custom semiconductor industry is one example that have learned to assist user innovators by providing them with toolkits for developing new products User innovation has a positive impact on social welfare and von Hippel proposes that government policies including R D subsidies and tax credits should be realigned to eliminate biases against it The goal of a democratized user centered innovation system says von Hippel is well worth striving for An electronic version of this book is available under a Creative Commons license

Human-Computer Interaction Symposium Fabio Paternò,Annelise Mark Pejtersen,2008-07-08 The IFIP World Computer Congress WCC is one of the most important conferences in the area of computer science and a number of related Human and Social Science disciplines at the worldwide level and it has a federated structure which takes into account the rapidly

growing and expanding interests in this area Human Computer Interaction is now a mature and still dynamically evolving part of this area which is represented in IFIP by the Technical Committee 13 on HCI We are convinced that in this edition of WCC which takes place for the first time in Italy it will be interesting and useful to have a Symposium on Human Computer Interaction in order to present and discuss a number of contributions in this field There has been increasing awareness among designers of interactive systems of the importance of designing for usability but we are still far from having products that are really usable and usability can mean different things depending on the application domain We are all aware that too many users of current technology feel often frustrated because computer systems are not compatible with their abilities and needs with existing work practices As designers of tomorrow technology we have the responsibility of creating computer artefacts that would permit better user experience with the various computing devices so that users may enjoy more satisfying experiences with information and communications technologies

Redefining Adaptation Studies Dennis Cutchins, Laurence Raw, James M. Welsh, 2010-02-23 Since films were first produced adapted works have predominantly borrowed primarily from traditional texts such as novels and plays Likewise the study of film adaptations has also been fairly traditional rarely venturing beyond a comparison of the source material to its often less revered counterpart *Redefining Adaptation Studies* breaks new ground in showing the range of possibilities that transcend the literature film paradigm These essays focus on the idea of adaptation and what it means in different socio political contexts Above all this collection shows how cultural and political factors determine the meaning of the term and its potential for developing new approaches to learning The contributors to this volume look at adaptation in different contexts and develop new ways to approach adaptation not just as a literature through film issue but as something which can be used to develop other skills such as creative writing and personal and social skills Aimed at teachers in high schools and universities at the under and postgraduate levels this volume not only suggests how adaptation might be used in different disciplines but how it might improve the learning experience for teachers and students alike
