**Measuring and Accounting for Innovation in the Twenty-First Century** Carol Corrado,Jonathan Haskel,Javier Miranda,Daniel Sichel,2021-05-12 Measuring innovation is a challenging task both for researchers and for national statisticians This task is timely and valuable given that policy and public interest in innovation has become increasingly intense in this era of digital revolution yet National GDP Accounts and other economic statistics do not fully account for the wide range of innovative activity that is plainly evident in everyday experience Indeed innovation has in many ways changed the structure of an increasingly digitized marketplace from cloud computing to the gig economy The papers collected in this volume Measuring and Accounting for Innovation in the Twenty First Century address many different dimensions of this challenge ranging from how to best to define GDP to the fundamental question of what is an innovation and how to collect data at the level of an individual innovation Taken together the volume provides a comprehensive overview of the cutting edge of this widely varied but thematically connected research that draws on multiple methodologies and data The editors and authors consider how measurement frameworks could be expanded to enhance our understanding of innovative activity new approaches and evidence that could account for innovation s economic impact innovation s effect across the economy from production processes to labor markets and financial activities and what practical adjustments could be made to current measurements that would better capture innovation The distinctive stance of this volume makes clear that the challenge of measuring innovation and understanding its implications has become increasingly complex as the economy has evolved The editors and authors show that the limitations of our existing measurement system significantly hinder researchers analysts and policymakers Better measures of innovative activity are necessary to interpret the consequences of innovation in daily life and to inform policies that best promote the attendant benefits including distribution of income trademark protections and more Now in an era of fake news and alternative facts it is more important than ever to push for accuracy in basic economic facts *Classroom Research on Mathematics and Language* Núria Planas,Candia Morgan,Marcus

Schütte,2021-03-22 This book offers an international perspective on the current and future state of the research focusing in particular on the role and use of language in mathematics school teaching and learning It focuses on the development of a unified view of the languages of the learners of the teachers and of mathematics by considering the role of language in the learning teaching and doing of mathematics in the classroom and the current richness and plurality of language and culture The contributions in this volume combine to show how views of language and of language research in mathematics education have changed significantly in recent decades and how they will continue to change and become even more complex and

challenging in the era of diversity All of these contributions by leading scholars are grouped into two sections for emphasis on issues of Theorising the complexity of language in mathematics teaching and learning Opening spaces of learning with mathematics classroom research on language This book will be of great interest to mathematics teachers teacher educators curriculum developers and mathematics education researchers who deal with the study and implementation of pedagogies of mathematics teaching and learning specifically in regions of the world which are culturally and sociolinguistically diverse

**The Trap of Proximity Violence** Ignazia Bartholini,2020-08-30 This book aims at shifting the emphasis from a general vision of gender based violence to a more opaque yet equally destructive one that related to proximity violence The first type of violence is exercised in multiple situations and in the generality of relationships experienced by people involving others who are both strangers to and intimate with each other Proximity violence provides and includes a fiduciary kind of proximity of dependent intimacy where the trust that the victim places in the other her tormentor favours the exercise of violence itself allowing it to take place thus making it practically imperceptible when not actually normal in extreme cases In turn this confidence is comparable to a veil of Maja which in conditions of vulnerability typical of victims attenuates the consequences of the violence undergone or the omens of what becomes violent action The conceptual triad proximity violence vulnerability resistance resilience is explored here in the three main chapters and in the details aimed at identifying in the final chapter the mutual interconnections This book will be of particular interest and use to undergraduate and graduate students of sociology and gender studies
