*Learning to See* Sherman Wilcox, Phyllis Perrin Wilcox, 1997 As more and more secondary schools and colleges accept American Sign Language ASL as a legitimate choice for second language study *Learning to See* has become even more vital in guiding instructors on the best ways to teach ASL as a second language And now this groundbreaking book has been updated and revised to reflect the significant gains in recognition that deaf people and their native language ASL have achieved in recent years *Learning to See* lays solid groundwork for teaching and studying ASL by outlining the structure of this unique visual language Myths and misconceptions about ASL are laid to rest at the same time that the fascinating multifaceted elements of Deaf culture are described Students will be able to study ASL and gain a thorough understanding of the cultural background which will help them to grasp the language more easily An explanation of the linguistic basis of ASL follows leading into the specific and above all useful information on teaching techniques This practical manual systematically presents the steps necessary to design a curriculum for teaching ASL including the special features necessary for training interpreters The new *Learning to See* again takes its place at the forefront of texts on teaching ASL as a second language and it will prove to be indispensable to educators and administrators in this special discipline *Storytelling and Conversation*

Elizabeth A. Winston, 1999 In this intriguing book renowned sociolinguistics experts explore the importance of discourse analysis a process that examines patterns of language to understand how users build cooperative understanding in dialogues It presents discourse analyses of sign languages native to Bali Italy England and the United States Studies of internal context review the use of space in ASL to discuss space how space in BSL is used to package complex narrative tasks how signers choose linguistic tools to structure storytelling and how affect emphasis and comment are added in text telephone conversations Inquiries into external contexts observe the integration of deaf people and sign language into language communities in Bali and the language mixing that occurs between deaf parents and their hearing children Both external and internal contexts are viewed together first in an examination of applying internal ASL text styles to teaching written English to Deaf students and then in a consideration of the language choices of interpreters who must shift footing to manage the interpreter's paradox *Storytelling and Conversation* casts new light on discourse analysis which will make it a welcome addition to the sociolinguistics canon **Assessing L2 Students with Learning and Other Disabilities**
