Social Justice and Education in the 21st Century Willie Pearson Jr., Vijay Reddy, 2021-04-10 The world is not an equal place There are high and low income countries and high and low income households For each group there are differential educational opportunities leading to differential educational outcomes and differential labor market opportunities This pattern often reproduces the privileges and inequalities of groups in a society This book explores this differentiation in education from a social justice lens Comparing the United States and South Africa this book analyzes each country's developmental thinking on education from human capital and human rights approaches in both primary and higher education The enclosed contributions draw from different disciplines including legal studies sociology psychology computer science and public policy

Let's Talk About Varsity, 2009 **Knowledge Beyond Colour Lines** Monwabisi K. Ralarala, Salochana Lorraine Hassan, Rajani Naidoo, 2021-05-25 Knowledge remains timely in education The need for academics to contemplate its relevance worth use and everything in between deems a continuous intellectual project rather than a conundrum to be solved This book takes the South African context by the horns as it challenges the often dormant and traditionalist ways in which higher education spaces see knowledge Through original research and the voices of academics and students this book argues for repurposing knowledge generation knowledge sharing and critical pedagogy so that more inclusive teaching and learning environments can be both imagined and sustained The contentious tensionalities that this creates for LoLT and SoTL in particular are unlocked so as to trouble the South African higher education landscape with the intent to proffer alternative pathways for a knowledge beyond colour lines Prof Shan Simmonds PhD NWU This edited volume bristles with fresh scholarly approaches and insights of an emergent generation of engaged scholars grappling with the issues and problems of higher education in South Africa The issues dealt with here are varied and encompassing They are treated with intellectual delicacy and probing sensitivity articulacy informed data and bold conclusions They serve well Prof Kwesi Kwaa Prah Emeritus Professor of Sociology University of the Western Cape Founder of the Centre for Advanced Studies of African Society

Discrimination in an Unequal World Miguel Angel Centeno, Katherine S. Newman, 2010-09 Is globalization making our world more equal or less Proponents of globalization argue that it is helping and that in a competitive world no one can afford to discriminate except on the basis of skills Opponents counter that globalization does nothing but provide a meritocratic patina on a consistently unequal distribution of opportunity Yet despite the often deafening volume of the debate there is surprisingly little empirical work available on the extent to which the process of globalization over the past quarter century has had any effect on discrimination Tackling this challenge *Discrimination in an Unequal World* explores the relationship between discrimination and unequal outcomes in the appropriate geographical and historical context Noting how each society tends to see its particular version of discrimination as universal and obvious the editors expand their set of cases to include a broad variety of social relations and practices However since methods differ and are often designed for

particular national circumstances they set the much more ambitious and practical goal of establishing a base with which different forms of discrimination across the world can be compared. Derived from a broad array of methods the book draws many important lessons on the new means by which the world creates social hierarchies, the democratization of inequality and the disappearance of traditional categories.

Open Learning as a Means of Advancing Social Justice Tabisa Mayisela, Shanali Govender, 2024-01-23. This volume investigates the uptake of open learning in South African Technical Vocational Education and Training (TVET) colleges and higher education institutions. Comprised of 16 studies focused on activities at a range of colleges and universities across the country, these chapters aim to promote a better understanding of open learning practices across the Post-School Education and Training (PSET) sector, including issues such as recognition of prior learning, access for students with disabilities, work-integrated learning, professional development, novel student funding mechanisms, leadership for open educational practices, institutional culture, student support, blended and online learning, flexible learning, online assessment, open educational resource development, models and funding, and micro-credentials. This collection of peer-reviewed chapters contributes to understanding the ways in which South African PSET institutions and educators are interpreting open learning as a means of advancing social justice. It includes a historical and contemporary understanding of the economic, cultural and political obstacles facing PSET, drawing on Nancy Fraser's theory of social justice as participatory parity to better understand the ways in which open learning may address systemic social injustices in order to allow South African students and educators to
