The Sutherland Inquiry Stewart R. Sutherland, Great Britain. Department for Children, Schools and Families, 2008 The Sutherland Inquiry HCP 62 session 2008 09 ISBN 9780102958393 is an independent inquiry remitted by the Office of the Qualifications and Examinations Regulator Ofqual and the Secretary of State for Children Schools and Families into the delivery of the National Curriculum tests in 2008 In July 2008 1 2 million pupils heard that their National Curriculum test results would be delayed The test delivery service represented a failure in customer delivery service to the pupils schools and also the markers upon whom the National Curriculum testing regime relies The primary responsibility must therefore rest with the American organisation ETS Global BV ETS which won the public contract to deliver the tests and failed its customers This report examines how this organisation secured the contract what its plans were and why its systems and process as a whole were not properly tested The report will also describe how ETS s systems failed during the test delivery process There was also a failure on the part of the Government s Non Departmental Public Body the Qualifications and Curriculum Authority to deliver its remit The report also sets out the procurement process that QCA used to select its delivery supplier ETS and how it managed the contract The report sets out a number of recommendations on how test delivery can improve in future years and has set out a number of key priorities including that the delivery process of the National Curriculum tests should be modernised and improved in consultation with the marking community including piloting online marking that whatever process is used should be thoroughly piloted and project managed to ensure schools and pupils get their results on time that the customer service provided to markers must be vastly improved to ensure that they are properly supported and are able to access up to date information

Alan Turing's Electronic Brain others, 2012-05-24 The mathematical genius Alan Turing now well known for his crucial wartime role in breaking the ENIGMA code was the first to conceive of the fundamental principle of the modern computer the idea of controlling a computing machine s operations by means of a program of coded instructions stored in the machine s memory In 1945 Turing drew up his revolutionary design for an electronic computing machine his Automatic Computing Engine ACE A pilot model of the ACE ran its first program in 1950 and the production version the DEUCE went on to become a cornerstone of the fledgling British computer industry The first personal computer was based on Turing s ACE Alan Turing s Automatic Computing Engine describes Turing s struggle to build the modern computer The first detailed history of Turing s contributions to computer science this text is essential reading for anyone interested in the history of the computer and the history of mathematics It contains first hand accounts by Turing and by the pioneers of computing who worked with him As well as relating the story of the invention of the computer the book clearly describes the hardware and software of the ACE including the very first computer programs The book is intended to be accessible to everyone with an interest in computing and contains numerous diagrams and illustrations as well as original photographs The book contains chapters describing Turing s path breaking research in the fields of Artificial

Germans the Battle of Britain providing Fighter Command an opportunity to recover This however is not necessarily the opinion of certain German scholars all of which is explored by the author The events of 7 September also saw the 12 Group Duxford Wing go into action for the first time the effects of which are analysed This review confirms that the formation massively over claimed and was not therefore as successful as believed at the time by certain senior commanders and politicians Likewise the events of 15 September 1940 long accepted as Battle of Britain Day are often stated to represent a great turning point in the aerial fighting of the summer of 1940 but is this correct Two days later Hitler postponed Operation Sealion the invasion of the United Kingdom indefinitely Could therefore this day be considered the date the Battle of Britain really ended Through diligent research combined with crucial official primary sources and personal papers Dilip unravels many myths often challenging the accepted narrative This is not simply another dull record of combat losses and claims far from it Drawing upon unique first hand accounts from a wide range of combatants and eyewitnesses along with Daily Home Intelligence Reports and numerous other primary sources this book forms part of what is likely to be the first and last such comprehensively woven account of this epic air battle
