In the background, a woman in a pink dress and a wide-brimmed hat stands near a white horse. The scene is framed by autumn leaves in shades of red and orange. Encyclopaedia of Universal Knowledge , 1883 **The Oracle Encyclopaedia** R. W. Egerton Eastwick, 1895 **Shadows & Dreams** Alexis Hall, 2019-12-02 Previously published newly revised by author I like my women like I like my whiskey liable to kill me The two parts of being a paranormal private investigator I could really do without are being forced to eat bananas by an animated statue with a potassium fixation and being put on trial for murder by a self appointed council of vampire oligarchs To be fair I did kind of do it the murder not the bananas But I was kind of saving my girlfriend who is kind of one of them On top of this I've also wound up with a primordial queen of the damned trying to strangle me in my dreams And the

conspiracy of undead wizards who tried to sacrifice me fifteen years ago has decided that now is the best possible time to give it another go Throw in the woman who left me for a tech start up the old girlfriend who I might sort of owe eternal mystical fealty to and a werewolf it girl who can't decide if she wants to eat me in the good way or the bad way and I'm beginning to think life would be easier if I made better choices Then again it'd be a whole lot less fun This book is approximately 98 000 words

Pamela H. Smith,2016-09-20 In *The Business of Alchemy* Pamela Smith explores the relationships among alchemy the court and commerce in order to illuminate the cultural history of the Holy Roman Empire in the sixteenth and seventeenth centuries In showing how an overriding concern with religious salvation was transformed into a concentration on material increase and economic policies Smith depicts the rise of modern science and early capitalism In pursuing this narrative she focuses on that ideal prey of the cultural historian an intellectual of the second rank whose career and ideas typify those of a generation Smith follows the career of Johann Joachim Becher 1635 1682 from university to court his projects from New World colonies to an old world Pansophic Panopticon and his ideas from alchemy to economics Teasing out the many meanings of alchemy for Becher and his contemporaries she argues that it provided Becher with not only a direct key to power over nature but also a language by which he could convince his princely patrons that their power too must rest on liquid wealth Agrarian society regarded merchants with suspicion as the nonproductive exploiters of others labor however territorial princes turned to commerce for revenue as the cost of maintaining the state increased Placing Becher s career in its social and intellectual context Smith shows how he attempted to help his patrons assimilate commercial values into noble court culture and to understand the production of surplus capital as natural and legitimate With emphasis on the practices of natural philosophy and extensive use of archival materials Smith brings alive the moment of cultural transformation in which science and the modern state emerged Nature Sir Norman Lockyer,1890 *The Circle of the Sciences*
