Regionalization of African Higher Education Jane Knight,Emnet Tadesse Woldegiorgis,2017-04-17 Growth in the scope scale and importance of higher education regionalization should not be underestimated or ignored Africa like Asia Europe and Latin America is promoting deeper cooperation among higher education bodies and institutions across the continent and focusing more attention on Pan African and sub regional harmonization of policies and programmes This is the first book which brings together diverse scholars and policy experts to examine key aspects and challenges of African higher education regionalization Chapters examine the progress and prospects of core regionalization issues and strategies such as academic mobility quality assurance recognition of qualifications research centres and networks curriculum and competencies and regional academic programmes Other chapters discuss important themes such as the relationship between regionalization internationalization and Africanization historical antecedents and perspectives an analytical model to understand functional organizational and political approaches to Africa s higher education regionalization and the influence of the Bologna process on the African Union s Strategy for the Harmonization of Higher Education Programmes Together these chapters provide a comprehensive overview of efforts by the African Union sub regional higher education associations such as IUCEA SARUA and CAMES Pan African organizations and actors key research networks and centres of excellence and the involvement or dependence on external actors and funders especially from Europe Fundamentally the book asks the question whether higher education regionalization in Africa is more rhetoric than reality It discusses the progress to date on specific themes identifies historical political sustainability and funding challenges and concludes that while the impacts of regionalization efforts have not been fully realized there is cautious optimism for the future Regional Review on Status and Trends in Aquaculture Development in Sub-Saharan Africa - 2015 Food and Agriculture Organization of the United Nations,2017 The present regional review and synthesis for sub Saharan Africa SSA provides an overview of major issues and trends in the aquaculture sector between 2004 and 2014 with emphasis on outstanding issues over the last five years The regional review reflects development in 41 countries in SSA for which production was reported to FAO in 2014 The production volume and value data have been derived from the latest FAO global aquaculture dataset 1950 2014 FishStat

Kenya National Assembly Official Record (Hansard) ,2012-02-15 The official records of the proceedings of the Legislative Council of the Colony and Protectorate of Kenya the House of Representatives of the Government of Kenya and the National Assembly of the Republic of Kenya **The Report: Kenya 2016** Oxford Business Group,2015-12-15 The Kenyan economy performed comparatively well in 2015 even in the face of global economic headwinds According to the World Bank GDP growth is expected to reach 5.4% for the year aided in large part by sustained public sector capital spending The country has a strong private sector and received encouraging signs of new oil gas and water reserves which if harnessed appropriately bode well for future growth The country s medium to long term economic outlook is robust With

over 40% of the population under the age of 15 Kenya stands to benefit from a significant demographic dividend provided that sufficient jobs can be found when this population enters the workforce The country has a reasonably sized industrial base competitive infrastructure and a large agricultural sector all of which offer opportunities for capital intensive investment UNESCO Science Report UNESCO,2021-06-18 **Science Research and Education in Africa** Alain L. Fymat,Joachim Kapalanga,2017-03-07 For various economic and political reasons many African countries lag behind the rest of the industrialised world in scientific and medical research and development However the presence of intellectual islands scattered across the continent gives hope that this is only a transient situation on the cusp of undergoing a profound and beneficial change For this reason the Society for the Advancement of Science in Africa was established to catalyse and contribute to this needed evolution Its mission is to contribute to Africa s economic advancement and sustainability through science research education and innovation This book provides a selection of papers from the Advancement of Science in Africa s third annual conference The conference was held under the overarching theme of science research and education in Africa with several important sub themes including but not limited to improving health research and disease surveillance education epidemic diseases with high mortality promoting women s interest in science careers fostering youth development with science education The collection illustrates how although the chapter contributors come from various countries and universities representing their own academic research they all share a common interest in advancing science research and education in Africa **Improving household consumption and expenditure surveys' food consumption metrics** Fiedler, John L.,Mwangi, Dena M.,2016-11-18 As the nature of global malnutrition changes there is a growing need and increasing urgency for more and better information about food consumption and dietary patterns The past two decades have seen a dramatic increase in the number availability and analysis of the food consumption data collected in a variety of multipurpose household surveys referred to collectively as household consumption and expenditure surveys HCESs These surveys are heterogeneous and their quality varies substantially by country Still they share some common shortcomings in their measurement of food consumption nutrient intakes and nutrition status that undermine their relevance and reliability for purposes of designing and implementing food policies and programs This review crafts a strategic approach to the unfinished global agenda of improving HCESs collection of food consumption data Starting with the priority studies recommended by a 100 country HCES review Smith Dupriez and Troubat 2014 it focuses on a strategic subset of those studies that deal most directly and exclusively with the measurement of food and that are of fundamental importance to all HCES stakeholders in low and middle income countries Drawing from the literature this study provides a more detailed more circumspect justification as to why these particular studies are needed while identifying key hypotheses explaining why these studies are of growing urgency and demonstrating why now is a propitious time for undertaking them The review also identifies important study design considerations while pointing out potential challenges to successful implementation

stemming from technical capacity economic administrative and political considerations Six key studies are rank ordered from a global perspective as follows taking into account 1 the likely shared consensus that a topic is an important source of measurement error in estimating consumption 2 the perceived urgency of the need for addressing a particular source of measurement error 3 the perceived likelihood of success that is that the efforts will improve the accuracy of measurement 4 whether or not the study entails modifying the questionnaire 5 the ease with which a study may begin and 6 the extent to which the study is independent of necessary negotiations with existing HCES stakeholders because of the types of changes it is likely to entail in either the questionnaire or the way the data have traditionally been processed

FAO/INFOODS Food Composition Table for Western Africa (2019) / Table de composition des aliments FAO/INFOODS pour l'Afrique de l'Ouest (2019) Food and Agriculture Organization of the United Nations,2020-02-20 Food composition data are useful throughout the food system for nutrition sensitive agriculture improved processing methods that ensure greater nutrient retention in foods nutrition labelling and to inform educate and protect consumers through food based dietary guidelines nutrition education and communication and legislation The FAO INFOODS Food Composition Table for Western Africa WAFCT 2019 is an update of the West African Food Composition Table of 2012 which lacked some important components foods and recipes WAFCT 2019 contains almost three times as many food entries and double the number of components with increased overall data quality Many of the data points from WAFCT 2012 have been replaced with better data mostly analytical data from Africa with a special emphasis on Western Africa These improvements are essential to understanding the nutrient composition of foods in the region and to promoting their appropriate use WAFCT 2019 is the result of four years of collaboration among INFOODS network researchers in Africa and the Nutrition and Food Systems Division of FAO and was developed as part of the International Dietary Data Expansion INDDEx Project implemented by Tufts University s Gerald J and Dorothy R Friedman School of Nutrition Science and Policy with funding from the Bill Melinda Gates Foundation These new data from WAFCT 2019 will support further research towards an expanded and improved evidence base and will support better more informed decisions and effective policies and programmes for improved nutrition in Africa

Advances in Breeding for Wheat Disease Resistance Peter Bulli,Christina Cowger,Marco Maccaferri,Feng Chen,Morten Lillemo,2022-11-03 Nutrition in Vulnerable Groups Enbo Ma,Yukiko Wagatsuma,2024-09-19 Nutrition requirements vary in children pregnancy and the elderly for the physiological difference in the body To maintain good health and prevent diseases the adequacy of nutrients is essential and adherence to healthy diets recommended needs to be monitored Uncertain physical social cultural and economic situations limit access to nutritious intake and impact health both in the developing e g wasting stunting underweight and mineral vitamin related malnutrition and developed e g obesity worlds However a healthy diet is not only determined by food safety and quality but also by food education nutritional practice during the life stages and food availability and accessibility to the population This is true in developing countries but also in

developed ones where vulnerable groups including people living in conditions of poverty unemployment lack of schooling people with forms of addiction and ethnical minorities struggle to adhere to healthy diets and choose cheaper and often unhealthy options As a consequence excessive consumption of limited nutrients and inappropriate supplementation becomes as unhealthy as not consuming enough In the past three years the pandemic of COVID 19 has put significant troubles on human society exacerbating hard life conditions in vulnerable groups and worsening their adherence to healthy lifestyles and food choices Therefore the nutrition and diet related health issues in vulnerable people must be highlighted and followed up

Supporting Entrepreneurship and Innovation Janet Crum, Samantha Schmehl Hines, 2019-04-29 Libraries have recently begun doing more to support entrepreneurship and innovation within their communities This volume explores how this has come about looking at libraries from across North America Europe and Africa and helps position readers to better understand what is happening and how this can be brought to further institutions

The Economics of Integrated Pest Management of Insects David W Onstad, Philip Crain, 2019-09-02 The book begins by establishing an economic framework upon which to apply the principles of IPM Then it looks at the entomological applications of economics specifically economic analyses concerning chemical biological cultural and genetic control tactics as well as host plant resistance and the cost of sampling Lastly it evaluates whether the control provided by a traditional IPM system is sufficient or if changes to the system design would yield greater benefits

Technology and Oligopoly Capitalism Luis Suarez-Villa, 2023-04-14 Technology and Oligopoly Capitalism is a major contribution to our understanding of how technology oligopolies are shaping America's social economic and political reality Technology oligopolies are the most powerful socioeconomic entities in America From cradle to grave the decisions they make affect the most intimate aspects of our lives how we work what we eat our health how we communicate what we know and believe whom we elect and how we relate to one another and to nature Their power over markets trade regulation and most every aspect of our governance is more intrusive and farther reaching than ever They benefit from tax breaks government guarantees and bailouts that we must pay for and have no control over Their accumulation of capital creates immense wealth for a minuscule elite deepening disparities while politics and governance become ever more subservient to their power They determine our skills and transform employment through the tools and services they create as no other organizations can They produce a vast array of goods and services with labor marketing and research that are more intrusively controlled than ever as workplace rights and job security are curtailed or disappear Our consumption of their products and their capacity to promote wants is deep and far reaching while the waste they generate raises concerns about the survival of life on our planet And their links to geopolitics and the martial domain are stronger than ever as they influence how warfare is waged and who will be vanquished Technology and Oligopoly Capitalism's critical multidisciplinary perspective provides a systemic vision of how oligopolistic power shapes these forces and phenomena An inclusive approach spans the spectrum of technology oligopolies and the ways in which they deploy their power Numerous

previously unpublished ideas expand the repertory of established work on the topics covered advancing explanatory quality to elucidate how and why technology oligopolies operate as they do the dysfunctions that accompany their power and their effects on society and nature This book has no peers in the literature in its scope the unprecedented amount and diversity of documentation the breadth of concepts and the vast number of examples it provides Its premises deserve to be taken into account by every student researcher policymaker and author interested in the socioeconomic and political dimensions of technology in America *Food and Nutrition Security: Underutilized Plant and Animal-Based Foods* Yasmina
