

STP8000 Series CAR KIT

INSTALLATION & USER GUIDE

sepura

The user and located at a distance of (15 – 25) cm from the user's mouth. It is primarily intended for use in cars and light goods vehicles. The recommended positions are on the "A" pillar (for driver only) or centre-front of roof (for driver and front passenger). For larger vehicles, greater distances can be accommodated by increasing the remote microphone gain via the customising file in the radio. However, the noise and echo cancelling performance of the car kit may be compromised.

Mount the microphone using the self-adhesive Velcro™ mounting supplied. Alternatively, for rugged applications, secure the base with self-tapping screws. Plug the microphone into the jack socket labelled "MIC".

PTT

The PTT keypad should be mounted to be convenient to the user when in a normal driving position. Plug the PTT into the jack socket labelled "PTT". Mount the PTT using the self-adhesive Velcro™ mounting supplied.

Loudspeaker Installation

The loudspeaker should be positioned so that it is unobstructed and clearly audible by the user, but not close to, or in line of sight of, the remote microphone. The recommended position is in the passenger footwell, facing the driver.

Connect the loudspeaker lead to the 2-pin flying connector on the vehicle harness.

Antenna Installation

Follow the manufacturer's instructions supplied with the antenna. Connect the BNC plug to the flying lead from the cradle and secure the leads.

Ignition Sense Input (blue wire)

If used, remove the crimp terminal from the blue wire and connect it to the ignition switched supply.

If not used, plug the crimp terminal into the spare receptacle in the plug housing of the main wiring harness supplied with the car kit. Fold (do not coil) the spare wire together and secure.

External Mute Output (pink wire)

If the vehicle has an entertainment system with a standard external mute control, connect this output directly to it. During a call, the output switches to ground and the entertainment system is muted. Use the appropriate connector for the entertainment system installed.

If the entertainment system has no mute control, the external mute output can be used to enable a relay to control the loudspeakers. When enabled, the output is switched to ground and protected by an internal re-settable 0.5 A fuse which resets automatically when the fault is cleared.

If not used, fold (do not coil) the spare wire together. Insulate the free end and secure.

External Alert Output (yellow wire)

If local regulations permit, this output can be used to enable a relay (not for direct connection) to control the vehicle horn or other external alerting device. During a call alert, this output switches to ground and the alerting device is audible

outside the vehicle. It is protected by an internal re-settable 0.5 A fuse which resets when the fault is cleared.

If not used, fold (do not coil) the spare wire together. Insulate the free end and secure.

IMPORTANT

To avoid possible damage to the interface unit, check all wiring for short circuits to chassis, and other errors, before power is connected.

OPTIONAL ACCESSORIES

Handset/Fist Microphone (or Speaker microphone) & Soft Key

Mount the rest so that it is easily accessible to the user. Place the accessory on its rest. Plug the accessory into the RJ45 socket labelled "HANDSET / FIST MIC". For strain relief, fit the "P" clip to the cable and secure with one of the interface unit fixing screws.

The soft key is located at the top of the fist microphone.

Alarm Foot-switch (Soft Key 3)

This item is not supplied by Sepura plc. A suitable switch will be terminated in a 3.5 mm stereo jack plug with the switch connected between the sleeve and the tip and the ring open circuit. The alarm will be activated when the switch closes ($Z < 100 \Omega$).

OPERATION

SAFETY WARNING

DO NOT operate your STP8000 radio in an explosive atmosphere. Always comply with "Turn OFF Two-way radios" signs where these are posted

• Inserting the STP8000 radio into the cradle

If necessary, remove the rubber bungs from the radio facility socket and the antenna socket. Lower the STP8000 into the holster and push down lightly to fully engage with the facility socket in the bottom of the holster. Push the front of the radio towards the back of the cradle until the latch operates. The car kit switches on automatically when the radio is inserted.

Note: To maintain reliable aerial operation, clean the holster aerial connector regularly using an aerosol can of clean air.

• Removing the STP8000

Press the release button at the top of the cradle and withdraw the radio. The car kit switches off automatically when the radio is removed and draws negligible power from the vehicle's battery.
