

NOTES

► California Emission Control System Limited Warranty

Detailed information about these warranties is listed in the Service and Warranty Information Booklet for US models or in the Warranty and Service Guide Booklet for Canadian models.

Your vehicle has been specifically adapted and designed to meet the particular operating conditions and registration requirements in your country and continental region in order to deliver the full driving pleasure while the vehicle is operated under those conditions. If you wish to operate your vehicle in another country or region, you may be required to adapt your vehicle to meet different prevailing operating conditions and registration requirements. You should also be aware of any applicable warranty limitations or exclusions for such country or region. In such a case, please contact Customer Relations for further information.

Maintenance

Maintain the vehicle regularly to sustain road safety, operational reliability and the New Vehicle Limited Warranty.

Specifications for required maintenance measures:

- MINI Maintenance System
- Service and Warranty Information Booklet for US models
- Warranty and Service Guide Booklet for Canadian models

If the vehicle is not maintained according to these specifications, this could result in serious damage to the vehicle. Such damage is not covered by the MINI New Vehicle Limited Warranty.

DATA MEMORY

A variety of electronic components in your vehicle include data storage devices, which store technical information on the condition of your vehicle, events and errors, either temporarily or permanently. In general, this technical informa-

tion documents the condition of a component, a module, a system or the surroundings:

- Operating conditions of system components, e.g., fill levels.
- Status messages regarding the vehicle and of its individual components, such as wheel rpm/vehicle speed, response delay, lateral acceleration.
- Malfunctions and defects in the major system components, such as the lights and brakes.
- Responses of the vehicle in special driving situations, such as the deployment of an air-bag, the utilization of stability control systems.
- Environmental conditions, such as temperature.

These data are exclusively of a technical nature and are used for the detection and correction of errors, as well as the optimization of vehicle functions. Motion profiles of traveled routes can not be deduced from these data. If services are required, such as repair services, service processes, warranty claims and quality assurance, then this technical information can be read out by employees of service departments, including the manufacturer, from the event and error data storage devices by using special diagnostic equipment. There, if necessary, you will receive further information. After remedying an error, the information in the error memory is deleted or progressively overwritten.

When using the vehicle, situations are conceivable in which this technical data, in conjunction with other information, such as accident reports, vehicle damage, witness statements, etc. - possibly with the assistance of an expert - could be traced to particular individuals. Additional functions that are agreed upon contractually with the customer, such as vehicle tracking in case of emergency, permit the transmission of certain vehicle data from the vehicle.
