

4 Portable Programmer Operation

The Portable Programmer (PP) model PP32, works with OS600 or OS700 Onity safes and Onity door locks. The PP can open safes when the batteries are spent.

If OS700 safes are used with the HT24w, HT22, and OnPoint systems, it must be programmed through the PP. If the OS70C safes are used with the OnPortal system the PP or the tablet PP can be used. The safes must be added in the system locking plan using one of the front desk Onity systems. Use the PP to test, perform maintenance, initialize, update, and collect the audit data from the safes.

Portable Programmer	Tablet Portable Programmer
	

4.1 Initialization

This option is used to establish the safe operation and provide a name to the safe. This is mostly used when installing the OS700 safe the very first time.

Note: The door must be open for the initialization.

Step	Action	
1.	Load the data of the OS700 safes to the PP from the Onity front desk.	
Note: The programming of the safe must be done with the door opened.		
2.	Open the OS700 safe with the construction card.	
3.	On the safe, remove the plastic plate that covers the PP connection jack.	
4.	Connect the PP to the safe.	
5.	Turn ON the PP.	
6.	Using the arrow keys, select the menu option # 4. Initialize, or select the Initialize Lock option on the screen.	
7.	Choose the safe to initialize by selecting the \$ sign and room number (example: \$101).	
8.	For the PP, press TX and for the tablet, tap Initialize Lock .	
9.	Disconnect the PP from the safe when finished.	
10.	Test the safe with a new guest card and the safe emergency card.	
11.	Align the plastic plate tabs with the tab slots and snap in position to replace the plate that was removed in step 3.
