Pantheism and Ecology Luca Valera, 2023-11-14 This book provides a comprehensive overview of the relationship between pantheism and ecology particularly considering different cultural approaches and diverse religious theological and

philosophical traditions Environmental ethics arises from the dangerousness and harmfulness of human beings with respect to nonhuman species and more generally with respect to the environment A common starting point for environmental ethics standpoints is that human beings are responsible for damaging nature The famous four laws of ecology drafted by Barry Commoner precisely express this guilt on the part of human beings who very often voluntarily violate the behavioral indications that emerge from nature itself These aspects concern environmental ethics outlooks Eco theology then takes a further step not only do we damage the ecosystem but also as many authors suggest when we humans destroy the natural world we are wounding God Such an idea implies a possible coincidence of God with the natural world or the ecosystem From this assumption different questions may emerge what is the kind of coincidence between God and the natural world Are God and the ecosystem coextensive If so are we re sacralizing the natural world and grounding intrinsic values in theological postulates and statements These questions lead us to reconsider the cosmological assumptions that ground our environmental judgements from theology to different religious traditions and cultures to philosophical worldviews In particular we will focus on the cosmological assumptions of pantheism considering its differences with panentheism discussing the symmetrical or asymmetrical relationships between God and the finite ways in which God manifests Godself In this regard the book is divided into three main parts in the first part the question of pantheism is approached from different traditions and with a special focus on the main thinkers in the history of thought from Greek Stoicism to the present day In the second part some current ecological concerns are considered in relation to pantheistic cosmology the authors will deepen issues from the discussion of the different pan conceptions to the problem of evil to Anthropocene Finally in the third part the different chapters will focus on ethical issues in the field of the current environmental crisis with a huge connection with the pantheistic cosmologies This book is oriented to a wide public interested in environmental issues and looking for an approach from different cultures and traditions Evidently due to its academic nature this book is also intended to be a great support for researchers interested in eco theology and more specifically in the relationship between pantheism and ecology It is not in this sense a classic book on environmental ethics but a book that delves into the fundamentals of environmental philosophy privileging the Ibero American approach

Contemplative Practices in Higher Education Daniel P. Barbezat, Mirabai Bush, 2013-12-04 Contemplative pedagogy is a way for instructors to empower students to integrate their own experience into the theoretical material they are being taught in order to deepen their understanding help students to develop sophisticated problem solving skills support students sense of connection to and compassion for others and engender inquiries into students most profound questions Contemplative practices are used in just about every discipline from physics to economics to history and are found in every type of institution Each year more and more faculty education reformers and leaders of teaching and learning centers seek out best practices in contemplative teaching and now can find them here brought to you by two of the foremost leaders and innovators on the subject This book presents background information and

ideas for the practical application of contemplative practices across the academic curriculum from the physical sciences to the humanities and arts Examples of contemplative techniques included in the book are mindfulness meditation yoga deep listening contemplative reading and writing and pilgrimage including site visits and field trips **The Priority of the Other** Mark Freeman, 2014 Contemporary psychology as well as our own self understanding remains largely ego centric in focus with the self being seen as the primary source of meaning and value According to Mark Freeman this perspective is belied by much of our experience Working from this basic premise he proposes that we adopt a more ex centric perspective one that affirms the priority of the Other in shaping human experience In doing so he offers nothing less than a radical reorientation of our most basic ways of making sense of the human condition In speaking of the Other Freeman refers not only to other people but also to those non human others for instance nature art God that take us beyond the ego and bring us closer to the world In speaking of the Other s priority he insists that there is much in life that comes before us By thinking and living the priority of the Other we can therefore become better attuned to both the world beyond us and the world within At the heart of Freeman s perspective are two fundamental ideas The first is that the Other is the primary source of meaning inspiration and existential nourishment The second is that it is the primary source of our ethical energies and that being responsive and responsible to the world beyond us is a defining feature of our humanity There is a tragic side to Freeman s story however Enraptured though we may be by the Other we frequently encounter it in a state of distraction and fail to receive the nourishment and inspiration it can provide And responsive and responsible though we may be it is perilously easy to retreat inward to the needy ego The challenge therefore is to break the spell of the ordinary oblivion that characterizes much of everyday life The Priority of the Other can help us rise to the occasion **Honing Self-Awareness of Faculty and Future Business Leaders** Payal Kumar, Tom Elwood Culham, Richard J. Major, Richard Peregoy, 2023-04-10 Honing Self Awareness of Faculty and Future Business Leaders emphasizes self awareness and management of emotions as a strong differentiator for generating student engagement well being and performance in complex and ambiguous societal and economic VUCA environments **Painting and Presence** Anthony Rudd, 2022-07-21 This book is concerned with why or whether paintings have value why they might be worth creating and attending to The author starts from the challenge expressed in Plato s critique of the arts generally according to which they do not lead us to what is true and good and may take us away from them Rudd tries to show that this Platonic Challenge can be answered in its own terms that painting is good because it does lead us to truth What paintings can give us is a non discursive knowledge by acquaintance in which the essence of the painting s subject matter is made present to the viewer Rudd traces this understanding of painting as ontologically revelatory from the theology of the Byzantine Icon to classical Chinese appreciations of landscape painting to the work of Merleau Ponty and other Phenomenologists inspired by European Modernist art He argues that this account of painting as disclosing the essences of things can also take up what is right about expressive and formalist theories of painting and that it can apply as

much to abstract as to representational painting But to disclose the reality of things can only be of value if the reality disclosed is itself of value and in the concluding part of the book Rudd argues that the value of painting can only be properly understood in the context of a wider metaphysics or theology in which value is understood not as a human projection but as a basic characteristic of reality as such

The Many Faces of Relativism Maria Baghramian, 2015-10-14 This book is a study of relativism as a dominant intellectual preoccupation of our time Relativism asks how we are to find a way out of intractable differences of perspectives and disagreements in various domains Standards of truth rationality and ethical right and wrong vary greatly and there are no universal criteria for adjudicating between them In considering this problem relativism suggests that what is true or right can only be determined within variable contexts of assessment This book brings together articles published in

the International Journal of Philosophical Studies over a period of 17 years as well as in a Special Issue of the journal published in 2004 The chapters in Section I discuss some of the main forms of relativism Section II sheds light on the different motivations for relativism assessing their strengths and weaknesses Section III provides a detailed examination of the vexed question of whether Ludwig Wittgenstein in his later work supported relativism The varied responses to this important question shed light on the issues discussed in Sections I and II This collection is a lively and engaging resource for scholars interested in the crucial impact relativism has had on the way we think about the meaning of truth and what is right and wrong The chapters in this book were originally published in the International Journal of Philosophical Studies

The Cristos yacentes of Gregorio Fernandez Ilenia Col?n Mendoza, 2017-07-05 Analyzing seventeenth century images of the dead Christ produced by Gregorio Fernandez author Ilenia Col endoza investigates how and why the artist and his patrons manipulated these images in connection with the religious literature of the time to produce striking images that moved the faithful to devotion In so doing she contributes new findings to the topic of Spanish sacred sculpture The author re examines these sculptures not only in the context of a larger sculptural group but also as independent sculptures that were intended as powerful aids to contemplation and devotion as was prescribed by the writings of San Juan de la Cruz and Luis de Granada Combining study of the sculptural works with that of liturgical sources she reveals the connection between the written word and the sculpted work of art Through this interdisciplinary approach the author links Fernandez's sculptural program with the strategic objectives of major patrons of the period such as the Duke of Lerma and King Philip III of Spain both fervent defenders of the Catholic faith
