explores the often stormy French U S relationship and the evolution of the Atlantic Alliance under the presidency of Charles
de Gaulle 1958D1969 The first work on this subject to draw on previously inaccessible material from U S and French
archives the study offers a comprehensive analysis of Gaullist policies toward NATO and the United States during the 1960s
a period that reached its apogee with de GaulleOs dramatic decision in 1966 to withdraw from NATOOs integrated military
arm This launched the French policy of autonomy within NATO which has since been adapted without having been
abandoned De GaulleOs policy often has been caricatured by admirers and detractors alike as an expression of nationalism or
anti Americanism Yet Frederic Bozo argues that although it did reflect the GeneralOs quest for grandeur it also and perhaps

more important stemmed from a genuine strategy designed to build an independent Europe and to help overcome the system of blocs. Indeed, the author contends de Gaulle's actions forced NATO to adapt to new strategic realities. Retracing the different phases of de Gaulle's policies, Bozo provides valuable insight into current French approaches to foreign and security policy, including the recent attempt by President Chirac to redefine and normalize the France-NATO relationship. As the author shows, de Gaulle's legacy remains vigorous as France grapples with European integration, a new role within a reformed NATO, and relations with the United States.
