Patent Engineering Donald S. Rimai, 2016-02-29 Patents are a vital asset in the modern business world They allow patent holders to introduce new products in to a market while deterring other market players from simply copying innovative features without making comparable investments in research and development In years past a few patents may have provided adequate protection That is no longer the case In today s world it is critical that innovative companies protect the features of their products that give them a competitive advantage with a family or portfolio of patents that are strategically generated to

protect the market position of the patent holder A patent portfolio that deters competitors from introducing competitive products in a timely manner can be worth billions of dollars Anything less than this is an expensive and possibly fatal distraction This book provides a strategic framework for cost efficient engineering of patent portfolios that protect your investments in research and development and that extend the market advantages that these investments provide

National Historical Publications and Records Commission,2000 *Historical Documentary Editions* ,2000 *Interactive Assessment* H. Carl Haywood,David Tzuriel,2013-11-11 The terms interactive and dynamic would never have been associated with psychological and psychoeducational assessment a generation ago They have currency now because of widespread dissatisfaction with the normative standardized testing model criticism of theoretical concepts of intelligence recognition of abuses of standardized intelligence testing and frustration with prediction and classification as primary goals of assessment It is almost certainly true that public policy concerns propel scientific activity far more often than science propels public policy In the case of psychological assessment public policy concerns have arisen in the last 20 years primarily around issues of possible discrimination against members of ethnic minorities At the same time there has been a re surge of dedication to excellence in education goals These concerns have led to such extreme measures as prohibition of the use of standardized intelligence tests to determine school placement decisions especially for minority children They have led also to a search for alternatives to standardized normative testing The chapters in this volume represent a variety of answers to this need
