    Driver Selection Tests and Measurement Ronald R. Knipling,Gene Bergoffen,2011 TRB s Commercial Truck and Bus Safety Synthesis Program CTBSSP Synthesis 21 Driver Selection Tests and Measurement synthesizes information on the use of tests measurements and other assessment methods used by commercial truck and bus companies in the driver selection process The report also identifies and describes driver selection methods and instruments and their potential usefulness in predicting driver crash risk Publisher s description   <u>The Neuroscience of Intelligence</u> Richard J. Haier,2016-12-28 This book introduces new and provocative neuroscience research that advances our understanding of intelligence and the brain Compelling evidence shows that genetics plays a more important role than environment as intelligence develops from childhood and that intelligence test scores correspond strongly to specific features of the brain assessed with neuroimaging In understandable language Richard J Haier explains cutting edge techniques based on genetics DNA and imaging of brain connectivity and function He dispels common misconceptions such as the belief that IQ tests are biased or meaningless and debunks simple interventions alleged to increase intelligence Readers will learn about the real possibility of dramatically enhancing intelligence based on neuroscience findings and the positive implications this could have for education and social policy The text also explores potential controversies surrounding neuro poverty neuro socioeconomic status and the morality of enhancing intelligence for everyone Online resources including additional visuals animations questions and links reinforce the material   *Item Response Theory* Ronald K. Hambleton,H. Swaminathan,2013-11-11 In the decade of the 1970s item response theory became the dominant topic for study by measurement specialists But the genesis of item response theory IRT can be traced back to the mid thirties and early forties In fact the term Item Characteristic Curve which is one of the main IRT concepts can be attributed to Ledyard Tucker in 1946 Despite these early research efforts interest in item response theory lay dormant until the late 1960s and took a backseat to the emerging development of strong true score theory While true score theory developed rapidly and drew the attention of leading psychometricians the problems and weaknesses inherent in its formulation began to raise concerns Such problems as the lack of invariance of item parameters across examinee groups and the inadequacy of classical test procedures to detect item bias or to provide a sound basis for measurement in tailored testing gave rise to a resurgence of interest in item response theory Impetus for the development of item response theory as we now know it was provided by Frederic M Lord through his pioneering works Lord 1952 1953a 1953b The progress in the fifties was painstakingly slow due to the mathematical complexity of the topic and the nonexistence of computer programs   *A Compendium of Neuropsychological Tests* Esther Strauss,Elisabeth M. S. Sherman,Otfried Spreen,2006-04-06 For the practicing neuropsychologist or researcher keeping up with the sheer number of newly published or updated tests is a challenge as is evaluating the utility and psychometric properties of neuropsychological tests in a clinical context The goal of the third edition of A Compendium of Neuropsychological Tests a well established
