

Self-Evaluation/Reflection Paper

This self-evaluation/reflection paper will give me the opportunity to assess my learning throughout the course of Foundations of Educational Technology and the next steps I will take in the learning process.

I began learning in this course by reviewing the materials, researching related topics and ultimately demonstrating the knowledge obtained in an applied way. To me this was the implication of the educational technology competencies; to provide the student with direction, insight, and examples and then to let the student learn by doing. This competency based and very structured approach to learning was very effective in my case and I truly believe that this approach helped me to gain every competency described.

I have found that Educational Technology and its domains are vast and ever changing. The learning platform and online resources in this course provided exciting new prospects for the field of education. As an educator I can now take advantage of these resources by planning, designing and utilizing these resources in effective ways that will communicate the relative advantage to others.

In this course I was able to explore the Blackboard platform and create my own homepage on it using HTML. It was my first attempt with either of these mediums, which I found very enlightening, beneficial and intriguing. It was an interesting experience that led to more independent learning about HTML and Blackboard. I now plan on incorporating Blackboard into my on ground courses.

I was also exposed to FTP and the tiger server by uploading material for my own page on the WWW. This was also a new experience that helped me overcome my long-standing apprehension at doing so. Exploring a WYSIWYG program for the planning, development and building of this web page was also challenging and very rewarding. I have now found myself advising my students to do the same.

Working in a group online was facilitated a lot more smoothly than I had anticipated. I found my group helpful dependable and very constructive. We were able to find an educational site, develop criteria, and produce an understandable evaluation based on our group consensus. I have now become more critical when analyzing information online. I found that there is a lot of information out there, some dependable and some not. Most importantly, well-developed content and presentation go a long way in effective communication of educational goals. Because of this experience, I will welcome any group projects that I may be assigned in the future.

Self Evaluation Essay Examples:

Student Self-Evaluation: Fostering Reflective Learning Jean MacGregor, 1993 For several decades college teachers have been asking students to engage in self evaluation to reflect on their academic work and describe and evaluate it in writing Student self evaluation is both a process consisting of acts of reflecting composing and writing and a product a written document Student self evaluation does not obviate the need for student exams and papers crucial indicators of student mastery of material or complexity of thinking Rather student self evaluation supplements and complements that information by asking students to describe in their own words their learning and its value to them This writing and the conversations that faculty members and students have about it can be instructional illuminating and at times transformative Student self evaluation is primarily a learning strategy but it is also a promising assessment approach while enriching learning for students it also can help teachers and institutions learn about student learning This volume of New Directions for Teaching and Learning introduces the many forms of student self evaluation in undergraduate teaching settings and describes how student self evaluation creates connections between learners and learning knowers and the known and the self and the mind This is the 56th issue of the quarterly journal New Directions for Teaching and Learning For more information on the series please see the Journals and Periodicals page [SAT Excellerator Critical Reading and Writing, Student Workbook](#) J. Reconstructing Response to Student Writing Dan Melzer,2023-08-07 In Reconstructing Response to Student Writing Dan Melzer makes the argument that writing instructors should shift the construct so that peer response and student self assessment are more central than teacher response Presenting the results of a national study of teacher and peer response and student self assessment at institutions of higher education across the United States Melzer analyzes teacher and peer response to over 1 000 pieces of student writing as well as 128 student portfolio reflection essays He draws on his analysis and on a comprehensive review of the literature on response to introduce a constructivist heuristic for response aimed at both composition instructors and instructors across disciplines Melzer argues that teachers and researchers should focus less on teacher response to individual pieces of student writing and more on engaging in dialogue with student self assessment and peer response focusing on growth and transfer rather than products and grades

Reconstructing Response to Student Writing especially when taken together with Melzer's previous book Assignments across the Curriculum provides a comprehensive and large scale view of college writing and responding across the curriculum in the United States
