**The Canadian Journal of Economics** ,2000 A general interest journal in economics

**Construction Dispute Research** Sai On Cheung, 2014-07-08 There are three specific purposes of Construction Dispute Research First this volume aims to summarise studies on construction dispute Second apart from the theoretical constructs where appropriate empirical tests are also included This approach serves to go beyond the commonly used anecdotal approach for the subject matters Third it is the sincere hope of the authors that this book will help shaping research agenda of construction dispute The studies are mostly framed from a management perspective drawing on methods and concepts in contract law economics psychology and management science The book has twenty chapters that are arranged in four parts covering conceptualisation avoidance negotiation and mediation Part 1 is devoted for dispute conceptualisation A building is only as strong as its foundation Thus it is no better start to study construction dispute by conceptualisation The theme of Part 2 is dispute avoidance The conventional wisdom of prevention is better than cure seems can be applied to all problems As far as construction dispute is concerned equitable risk allocation and trust are the two most commonly accepted avoidance strategies Part 3 focuses on negotiation that is the gateway to resolution as almost all disputes are negotiated first before the service of other mechanisms Negotiation is sometimes

described as an art because settlement may not be obtained solely from legal and rational approaches Part 3 discusses the behavioral dimensions of construction dispute negotiation Part 4 deals with Mediation a form of assisted negotiation Specially the skill of the mediators in facilitating settlement the interrelationships among dispute sources mediator tactics and mediation outcomes are explored The studies presented in Construction Dispute Research collectively demonstrate holistic approach in dispute management Each chapter can be read as a study on its own Practitioners will find the book a handy reference in dispute management and resolution Students would find the book useful in explaining in details the causes of dispute the processes to resolve them The research design and empirical approaches are particularly useful to students in construction management architectural surveying and civil engineering programs **Handbook of**

**Development Economics** Hollis Burnley Chenery, J. Behrman, T.N. Srinivasan, 1988 Handbooks of development economics edit Chenery v 1 **Understanding the Chinese Economies** Rongxing Guo, 2012-08-29 China's economic growth has been

more robust in some regions than others In a country as large as China examinations of regional differences can provide a viable way to learn about the economy as a whole Rongxing Guo provides a systematic introduction to the economies of China by describing their external and internal drivers and by placing them within geopolitical and even socio cultural boundaries His pairings of case studies and empirical techniques reveal a rich deep appreciation of the growth process and of interactions between key factors This book delves more deeply into issues surrounding the economy than other books offering a unique and important perspective that many will find useful Covering history and administrative structures unique economic features some domestic economic issues and international economic engagement it describes an often inaccessible perspective with nuances all students of China will find valuable Introduces China's regional economies often overlooked in US and European texts within larger contexts of social and geopolitical concerns Explains the reform process since 1978 in a comprehensive non technical and accessible manner Features case studies in each chapter **Industrial Organization**

Don E. Waldman, Elizabeth J. Jensen, 2016-07-01 Written solely for the undergraduate audience Industrial Organization Theory and Practice which features early coverage of Antitrust punctuates its modern introduction to industrial organization with relevant empirical data and case studies to show students how to apply theoretical tools *Global Ecopolitics* Peter John Stoett, 2012-01-01 Through case studies on biodiversity deforestation pollution and war among others Stoett analyzes the ability of international policy to provide environmental protection and discusses the ever present factors of equality sovereignty and human rights integral to these issues **The Economics of International Payments Unions and**

**Clearing Houses** Byron G. Auguste, 2016-07-27 International payments unions and clearing houses have been employed by 88 countries in Europe Asia Africa Latin America and the Caribbean to liberalise regional trade and payments during the past 50 years Yet their impact on participating countries has not been well understood When the republics of the former Soviet Union were deciding on new monetary regimes many economists proposed a payments union but could not estimate its

potential benefits or risks This book presents the first fully articulated theory of international payments unions and clearing houses in order to answer the questions When should a country choose to participate in a payments union What benefits and costs have actually resulted from existing and past clearing houses When should countries in a clearing house seek to form a payments union

**Global Competition Law and Economics** Einer Elhauge, Damien Geradin, 2011-08-03 This is the second edition of the acclaimed text on global antitrust law With markets becoming increasingly global mergers requiring approval in several different jurisdictions cartels in one nation affecting supply in others and countries increasingly entering into treaties with each other about the content or enforcement of competition laws antitrust law is now a truly global phenomenon Modern antitrust law is also different because it now reflects an increasingly economic approach to analysing antitrust and competition policy This innovative work is the only truly comparative and economically sophisticated casebook on the market Addressed to students from all jurisdictions having competition laws this casebook provides an in depth analysis of the two major global antitrust regimes in the world as well as a summary of selected national antitrust laws As such it will also serve as a useful reference for practitioners competition officials and policy makers interested in competition law In the four years since the first edition the increased globalization of antitrust law has continued apace China the world's third largest economy after the EU and US has adopted an antitrust law and other nations have modified and modernized their antitrust regimes The EU has adopted a new EU Treaty new EU guidelines on abuse of dominance new EU guidelines on non horizontal mergers and new EU regulations and guidelines on vertical agreements In the US there have been important new Supreme Court cases the 2009 *Linkline* and 2010 *American Needle* decisions and the appearance of a new economic approach in the revised 2010 U S Merger Guidelines This new edition expands and updates the pioneering approach of the first edition addressing new developments not only in the US and EU but also in Australia Brazil Canada Israel Japan South Africa and South Korea with expanded coverage of China's new antitrust law and the antitrust laws of Argentina Chile Colombia Egypt India Indonesia New Zealand Peru Russia Saudi Arabia Singapore Taiwan Thailand Turkey and Venezuela Praise for the first edition worthy of considerable praise contains a vast collection of well chosen material taking in a wide span of both antitrust and merger law issues It is well written and clear throughout particularly on the economic concepts and provides incisive commentary and questions which inspire further study Peter Whelan Cambridge Law Journal Enlightened law professors and law schools will best serve their students not by teaching national competition law but by adopting *Global Competition Law and Economics* an excellent book for introductory courses in comparative competition law at either a graduate or undergraduate level Okeoghene Odudu Common Market Law Review the best four and a half centimetres of shelf space that I have seen devoted to competition law and policy issues for a very long time Yvonne van Roy New Zealand Law Journal Free from the ideologically driven perspective that can affect other antitrust casebooks this is also the first casebook organized from inception with an eye directly on the global context this book may be

used in a classroom in Europe just as it will be used in the U S The result is a highly welcome contribution to the evolution of competition studies Judge Douglas Ginsburg this book is the only one on the market that is extremely well suited for use in a comparative antitrust law class an extraordinarily teachable book that contains everything you might want to present Finally the comparative antitrust field has a standard textbook to use And a wonderful standard it is Robert H Lande University of Baltimore Law School

*Budget Deficits and Economic Performance (Routledge Revivals)* Richard Burdekin, Farrokh Langdana, 2015-06-11 At the time in which this book was first published in 1992 there was a major concern with the macro economic implications of fiscal imbalance As the European economies moved closer to monetary union and Germany grappled with the fiscal pressures of unification deficits in the United States exceeded 300 billion In this volume the authors address this issue using both historical case studies and cross national comparisons This book will be of interest to students of economics

*Airline Operations and Scheduling* Massoud Bazargan, 2016-03-23 Operations research techniques are extremely important tools for planning airline operations However much of the technical literature on airline optimization models is highly specialized and accessible only to a limited audience Allied to this there is a concern among the operations research community that the materials offered in OR courses at MBA or senior undergraduate business level are too abstract outdated and at times irrelevant to today's fast and dynamic airline industry This book demystifies the operations and scheduling environment presenting simplified and easy to understand models applied to straightforward and practical examples After introducing the key issues confronting operations and scheduling within airlines *Airline Operations and Scheduling* goes on to provide an objective review of the various optimization models adopted in practice Each model provides airlines with efficient solutions to a range of scenarios and is accompanied by case studies similar to those experienced by commercial airlines Using unique source material and combining interviews with alumni working at operations and scheduling departments of various airlines this solution orientated approach has been used on many courses with outstanding feedback As well as having been comprehensively updated this second edition of *Airline Operations and Scheduling* adds new chapters on fuel management systems baggage handling aircraft maintenance planning and aircraft boarding strategies The readership includes graduate and undergraduate business management transportation and engineering students airlines training and acquainting new recruits with operations planning and scheduling processes general aviation flight school International Air Transport Association IATA and International Civil Aviation Organization ICAO training course instructors executive jet chartered flight air cargo and package delivery companies and airline consultants

**Oil Booms and Business Busts** Nimah Mazaheri, 2016 *Oil Booms and Business Busts* looks at how government policymaking shapes a puzzling phenomenon in economic development the curse of natural resources It investigates how oil and mineral wealth shapes a government's policies toward the business environment entrepreneurs and innovative activities Other similar work either ignores the role of government policymaking in oil wealth treats it as another effect of the rentier

state or dismisses it as illogical and incoherent One might expect that in light of such abundances governments would encourage entrepreneurship and new businesses to compete and grow in the market but Nimah Mazaheri shows that resource wealth instead incentivizes policymakers to focus on satisfying the interests of existing elites They more than oil poor nations institute barriers that impede the activities of domestic firms and entrepreneurs with the result being unimpressive economic performance over the past half century This is the first book to examine how oil wealth affects non elite actors who own the small and medium sized firms that absorb a majority of the economic and labor force of these countries Looking at two of the most important oil producing countries in the world Iran and Saudi Arabia the book provides an original theory about the factors that shape a logic of policymaking in oil producing states To extend his theory Mazaheri also looks at India which is one of the world s main coal producers He does this to show the effects of the gain and loss of a massive resource windfall on state policymaking toward the private sector Ultimately Mazaheri argues that such policymaking impedes the development of a middle class and therefore democratization a factor that can have overarching political repercussions for governmental stability

Documenting First Wave Feminisms Nancy M. Forestell, Maureen Moynagh, 2012-01-01 Contemporary feminists are used to juggling many different identities at once balancing affiliations based on race nation class and sexuality First wave feminists also negotiated or failed to negotiate similar tensions in their international organizing Using primary documents dating from the abolitionist movement to the Second World War Maureen Moynagh and Nancy Forestell investigate the tensions inherent in organizing early transnational feminist movements

*Strategy and Governance of Networks* George Hendrikse, Mika Tuunanen, Josef Windsperger, Gérard Cliquet, 2008-07-20 The book emphasizes research in economics and management of networks as an interdisciplinary field by offering new theoretical perspectives and presenting new empirical results on strategic and governance structure issues in cooperatives franchising networks alliances joint ventures and venture capital relations The authors apply different theoretical views on networks such as transaction cost theory property rights theory resource and knowledge based theory evolutionary theory information richness theory and social exchange theory
