Thermal Engineering Studies with Excel, Mathcad and Internet Valery Ochkov, Konstantin Orlov, Volodymyr Voloshchuk, 2016-02-05. This book provides the fundamentals of the application of mathematical methods, modern computational tools, Excel, Mathcad, SMATH, etc., and the Internet to solve the typical problems of heat and mass transfer, thermodynamics, fluid dynamics, energy conservation, and energy efficiency. Chapters cover the technology for creating and using databases on various properties of working fluids, coolants, and thermal materials. All calculation methods are provided with links to online computational pages where data can be inserted and recalculated. It discusses tasks involving the generation of electricity at thermal nuclear gas turbine and combined cycle power plants, as well as processes of CO₂ and trigeneration, conditioning facilities, and heat pumps. This text engages students and researchers by using modern calculation tools and the Internet for thermal engineering applications.

Software Reviews on File, 1988. *Subject Guide to Books in Print*, 1997. *American Journal of Physics*, 1990. Fuzzy Methods for Assessment and Decision Making Michael Gr. Voskoglou, 2024-10-08. Fuzzy Methods for Assessment and Decision Making presents the assessment of learning and problem-solving skills with qualitative grades. These methods are outcomes of the author's research work on the subject for more than 20 years. In particular, a hybrid assessment model uses the Center of Gravity (COG) defuzzification technique, closed real intervals, grey numbers, neutrosophic sets, and soft sets as tools. The book starts with the basic mathematical background that is needed for an understanding of its contents. The Rectangular Fuzzy Assessment Model (RFAM) of Subbotin and Voskoglou is presented next, the outcomes of which are compared to those of the GPA index. The book presents innovative fuzzy assessment methods enabling readers to assess the mean and quality performance of learning or problem-solving skills of a group of students when qualitative linguistic grades are used for this purpose. In the case of using linguistic grades for the assessment of a group's skills, the classical method of calculating the mean value of the numerical grades cannot be applied.

Also no safe conclusions can be obtained on comparing the quality performance of two groups when the values of their GPA index are equal Presents innovative fuzzy assessment methods to enable readers to assess the mean and quality performance of learning Discusses fuzzy logic and techniques for decision making in all domains Includes applications of fuzzy decision making as a hybrid model using soft sets grey numbers and neutrosophic sets *Thermal Radiation Heat Transfer* John R. Howell, M. Pinar Menguc, Robert Siegel, 2015-09-18 Explore the Radiative Exchange between Surfaces Further expanding on the changes made to the fifth edition *Thermal Radiation Heat Transfer* 6th Edition continues to highlight the relevance of thermal radiative transfer and focus on concepts that develop the radiative transfer equation RTE The book explains the fundamentals of radiative transfer introduces the energy and radiative transfer equations covers a variety of approaches used to gauge radiative heat exchange between different surfaces and structures and provides solution techniques for solving the RTE What's New in the Sixth Edition This revised version updates information on properties of surfaces and of absorbing emitting scattering materials radiative transfer among surfaces and radiative transfer in participating media It also enhances the chapter on near field effects addresses new applications that include enhanced solar cell performance and self regulating surfaces for thermal control and updates references Comprised of 17 chapters this text Discusses the fundamental RTE and its simplified forms for different medium properties Presents an intuitive relationship between the RTE formulations and the configuration factor analyses Explores the historical development and the radiative behavior of a blackbody Defines the radiative properties of solid opaque surfaces Provides a detailed analysis and solution procedure for radiation exchange analysis Contains methods for determining the radiative flux divergence the radiative source term in the energy equation *Thermal Radiation Heat Transfer* 6th Edition explores methods for solving the RTE to determine the local spectral intensity radiative flux and flux gradient This book enables you to assess and calculate the exchange of energy between objects that determine radiative transfer at different energy levels *Scientific and Technical Aerospace Reports*, 1994 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database *Whitaker's Books in Print*, 1998
