## Section 1.2—Early Ideas about the “Utility of Poverty”

What is GDP and what are some criticisms of using it to measure poverty?

- Total market value of the flow of all goods/services produced over a time period.
  - Quality of estimates
  - Doesn't include environmental costs
  - Nothing about income distribution

What is the most recent global poverty line as used by the World Bank? \$1.25 PPP

What is purchasing power parity? Why is it important in poverty measurement?

- PPP treats everyone as global citizens and fixes exchange rates for a common currency that differ from market exchange rates. Difference reflects the fact that there are commodities, such as many services that are cheaper in poorer countries, which are not commonly traded. PPP based on prices actually paid for many goods in each country

Which school of economic thought advocated a large export surplus? Explain how this group viewed trade as a zero-sum game.

- Mercantilism sought cheap production inputs and saw poverty as required for income effect of work. Relative gains, not absolute. Didn't create wealth, seized it

What is the “utility of poverty”? Draw a graph representing the labour-leisure decision for a household (see Review Session notes).

- Negatively sloped labor supply curve b/c people need hunger to be encouraged to work.
- Draw indifference curve and negatively sloped wage rate; leisure vs. consumption

Suppose the wage rate increases. Will a person work more or less (assume leisure is a normal good)? Why/why not? Is Bernard de Mandeville correct?

- If leisure is a normal good, the person will work more because

**Through a Lens of Scarcity** Hanna Luetke Lanfer, 2021-09-09. The conditions for strategic health communication campaigns as a public health tool are examined for low-income contexts. The theoretical framework drafts a socioecological model with an extension of poverty influences to bring into focus the dynamics of a resource-poor environment and its impact on health-related behaviours and health campaigns. The research design includes two studies conducted in Sierra Leone. Study 1 triangulated three qualitative methods to explore past and current health communication practice in Sierra Leone. Study 2 is a mixed-methods field experiment on handwashing which explored the effects of different campaign strategies. Results show that a community-based participatory approach with the inclusion of local leaders as health messengers was associated with higher chances of behaviour change than a non-treated setting. Further pathways for context-sensitive approaches for deprived audiences are suggested.

[IMF Financial Operations 2014](#) International Monetary Fund. Finance Dept., 2014-10-07. IMF Financial Operations 2014 provides a broad introduction to how the IMF fulfills its mission through its financial activities. It

covers the financial structure and operations of the IMF and also provides background detail of the financial statements for the IMF's activities during the most recent financial year. This publication updates a previous report entitled *Financial Organization and Operations of the IMF* first published in 1986 and last issued in 2001, the sixth edition. That 2001 report reflected the seismic shifts in the global economy and in the IMF's structure and operations that occurred after the fall of the Soviet Union and the various currency and financial crises of the 1990s. This revised and updated report covers more recent developments including measures taken in response to the global financial crisis of 2007-09 and the institutional reforms aimed at ensuring that the IMF's governance structure evolves in line with developments in the global economy as well as reforms to the IMF's income model.

*Perspectives on Inclusive Policies for Development in India* Saiyed Raza Hashim, Rahul Mukherji, Brajaraja Mishra, 2022-06-06. This book presents perspectives by eminent economists, social scientists, and policy makers exploring in depth the post-reform developments in India, including issues pertaining to growth and equity issues which have been at the core of life-time work of Prof. R. Radhakrishna. The book brings out how some public policy instruments created to promote growth have turned out to be regressive, promoting inequalities and creating a highly asymmetric federalism in India. It examines the efficacy of fiscal and monetary reforms and also emphasises the need for strengthening the institutions of governance, particularly judiciary and police, in order to boost investors' confidence. It presents exercises in econometric modelling for explaining factors in growth and vetting policies and explores the issue of governance and institutions. The book provides insights into the working of an emerging economy and a large democracy which has to strive for public acceptability of the tensions of its negotiations between equity and growth. With its depth of academic excellence and breadth of topics covered, it is a must-read for researchers, policy makers, industry watchers, think tanks, and NGOs.

*A Place at the Table* Judith Ann Brady, 2007-10. It's one thing to say that we believe in justice for all, but quite another to actively seek social justice for the poor in our midst. After extensive research, the author is convinced that a huge gap exists between talking about justice and actually doing justice for the poor. She believes that achieving justice for all requires a deep and broad approach that involves the integration of Catholic social teaching with Scripture and Tradition so that charity and justice actually become social justice. Only when people every race, nationality, class, and religion are educated for justice, built on respect for the person and the responsibility of individuals and the community, will we in the U.S. be able to cut through the rhetoric of blame and move toward solidarity.
