

Environmental Science 20 Final Review

Unit 1: What is Environmental Science? and Climate Change

1. What are some natural resources that are common resources? Air, fish, oil, trees
2. What is the atmosphere? Thin layer of gases surrounding the Earth
3. What layer of the atmosphere is closest to the Earth? Troposphere
4. How much solar energy reaches the Earth? 50%
5. List 4 greenhouse gases. Methane, water vapour, carbon dioxide, nitrous oxide, CFC's
6. What is the relationship between carbon dioxide and global temperatures? carbon dioxide increases so does temperature
7. List several ways scientists get their data on carbon dioxide levels from the past? Ice cores, tree rings.
8. How are hurricanes affected by global warming? There is no evidence of a link but in the last 30 years duration and strength have increased about 50%. Studies are looking at link between ocean surface temperature and hurricane intensity.
9. Where is most of the world's sheet ice located? Antarctica and Greenland
10. What are the 3 effects of melting of sheet ice at the poles? oceans levels rising 3 mm a year, penguin population down, polar bears declining
11. What are 2 effects of increased surface temperatures has on the water cycle? Higher rate of evaporation from land and sea, Warmer atmosphere is able to hold more water vapor, higher likelihood of heavy precipitation weather events (rain/snow)
12. Describe the cap and trade system used with carbon dioxide emissions. Limit the amount of carbon dioxide any specific factory or power plant can produce, use permits for amount carbon dioxide an organization can emit.
13. Give two examples of Global warming prevention strategies. Inject sulfur dioxide into stratosphere to block sunlight, sequester CO₂ into deep underground, remove CO₂ from smokestack and vehicle emissions
14. In order to have permanent safe storage of CO₂ using CO₂ sequestration, list 3 qualities that must be
1) Sufficient depth (typically deeper than 800 meters)
2) Adequate capacity
3) An overlying sealing system to ensure containment of fluids met.
Depleted hydrocarbon reservoirs, such as oil and gas fields

Unit 2: Terrestrial Ecosystems

15. Describe the different layers of a rainforest.
The emergent layer, the canopy, the understory, the forest floor

Section Review Environmental Science Answer:

Review of the Environmental Protection Agency's State-of-the-Science Evaluation of Nonmonotonic Dose-Response Relationships as they Apply to Endocrine Disruptors National Research Council, Division on Earth and Life Studies, Board on Environmental Studies and Toxicology, Committee to Review EPA's State of the Science Paper on Nonmonotonic Dose Response, 2014-05-27 Potential health effects from chemicals that disrupt endocrine function pose an environmental health concern because of their ability to interfere with normal hormone function in human and wildlife populations. The endocrine system regulates biological processes throughout the body and is sensitive to small changes in hormone concentrations. Endocrine disruptor research has focused primarily on chemicals that affect three hormone pathways that play important roles in reproduction and development: the estrogen, androgen, and thyroid hormone pathways. Some of this research has identified dose response relationships that have nonmonotonic curves. Nonmonotonic dose response curves (NMDRs) are of concern because they do not follow the usual assumption made in toxicology that as dose decreases the response also decreases. The existence of NMDRs has been a controversial topic for decades and there has been considerable debate about their implications for how chemicals are tested and for how risks from such chemicals are assessed. Toxicity tests are designed to identify hazards and to characterize dose response relationships so tests are aimed at finding a high dose that elicits a response and dose response is explored by testing lower doses spaced to identify statistically a no or lowest observed adverse effect level. The concern for NMDRs is that such studies as currently designed might not detect the inflection of the dose response curve if only a few doses are tested or if the change in inflection occurs below the range of doses tested. Another concern is that some NMDRs are found for biological effects that are not usually evaluated in toxicity tests. If current testing strategies are inadequate to account for NMDRs, changes to risk assessment practices might be necessary. To help address these issues, the U.S. Environmental Protection Agency (EPA) developed a draft State of the Science Evaluation: Nonmonotonic Dose Responses as they Apply to Estrogen, Androgen, and Thyroid Pathways, and EPA Testing and Assessment Procedures. EPA asked the National Research Council to conduct an independent review of this evaluation to ensure that it is scientifically sound and of high quality. Review of Environmental Protection Agency's State of the Science Evaluation of Nonmonotonic Dose Response as they Apply to Endocrine Disruptors evaluates whether EPA's evaluation presents a scientifically sound and high quality analysis of the literature on NMDRs. This report reviews how well the EPA evaluation described how the assessment was performed, whether consistent methods and criteria were applied in the analysis of different evidence streams, and whether appropriate methods were applied to evaluating the evidence. The report makes recommendations to improve EPA's process and strengthen the evaluation. *Ebook: Environmental Science: A Global Concern* William Cunningham, Mary Cunningham, 2014-10-16 Environmental Science: A Global Concern is a comprehensive presentation of environmental science for non-science majors which emphasizes critical thinking.

environmental responsibility and global awareness This book is intended for use in a one or two semester course in environmental science human ecology or environmental studies at the college or advanced placement high school level As practicing scientists and educators the Cunningham author team brings decades of experience in the classroom in the practice of science and in civic engagement This experience helps give students a clear sense of what environmental science is and why it matters in this exciting new 13th edition Environmental Science A Global Concern provides readers with an up to date introductory global view of essential themes in environmental science The authors balance evidence of serious environmental challenges with ideas about what we can do to overcome them An entire chapter focuses on ecological restoration one of the most important aspects of ecology today Case studies in most chapters show examples of real progress and What Can You Do lists give students ideas for contributing to solutions Environmental Science Michael L. FAQs About Section Review Environmental Science Answer Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer webbased readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Section Review Environmental Science Answer is one of the best book in our library for free trial.
