 discharge machining process is a popular non conventional machining process widely used to machine any conducting  
 material irrespective of hardness and strength In the present work remarkable improvement of machining performances like  
 material removal rate MRR Tool Wear Rate TWR and Surface Roughness SR have been observed using SiC powder mixed in  
 the usual EDM oil while machining Ti 6Al 4V material It is also observed that there is decrease of crack density of the  
 machined surface due to addition of SiC powder in EDM oil At last optimum sets of process parameters have been reported  
 using MRSN technique in both powder mixed case and without powder mixed case      **Structural Foundation Designers'**  
**Manual** W. G. Curtin,Gerry Shaw,Gary Parkinson,J. Golding,Norman Seward,2008-04-15 This manual for civil and structural  
 engineers aims to simplify as much as possible a complex subject which is often treated too theoretically by explaining in a  
 practical way how to provide uncomplicated buildable and economical foundations It explains simply clearly and with  
 numerous worked examples how economic foundation design is achieved It deals with both straightforward and difficult sites  
 following the process through site investigation foundation selection and finally design The book includes chapters on many  
 aspects of foundation engineering that most other books avoid including filled and contaminated sites mining and other man  
 made conditions features a step by step procedure for the design of lightweight and flexible rafts to fill the gap in guidance in  
 this much neglected yet extremely economical foundation solution concentrates on foundations for building structures rather  
 than the larger civil engineering foundations includes many innovative and economic solutions developed and used by the  
 authors practice but not often covered in other publications provides an extensive series of appendices as a valuable  
 reference source For the Second Edition the chapter on contaminated and derelict sites has been updated to take account of  
 the latest guidelines on the subject including BS 10175 Elsewhere throughout the book references have been updated to take  
 account of the latest technical publications and relevant British Standards      *Catalog of Copyright Entries. Third Series*
