Communication Skills Journal

This journal will show you how I grew as a communicator over the last 16 weeks. You will see 5 different journal entries. These also show growth through hardship which I find to be an interesting topic.

Communication Competence

My strengths as a communicator are communicating with friends, acquaintances, and in meetings. I attribute a lot of that to my mission and speaking opportunities in church.

Recently, I feel I have also become better at communicating with my supervisor at work due to issues we have had. I have had to stand up for myself. This has been one example in my life lately of becoming a more mindful communicator, seeing different viewpoints, and strengthening weaknesses.

I feel I could become better in the areas of group discussions and strangers. I often feel that others have more important or insightful things to say. Also, I have been shy since childhood so talking to strangers is a weakness I'm working on.

Perception and Self

I think my family immensely impacted my perception of others. I also believe my church has impacted my perception of others. I found the primacy effect very intriguing that we are more likely to put more value in the first information we know about a person. I want to work on putting as much value on the information learned after the first impression. One of my best friends scared me the first time I met her. She is built and intimidating but I'm glad I gave myself the opportunity to get to know her better.

Perception of self is such a struggle for me. I'm so hard on myself. I'm really good at comparing myself to others. I like the concept that the simple question of "tell me about yourself" can be super telling about your level of self-esteem. That makes me want to work harder on my self-esteem.

Nonverbal Communication in Close Relationships Robert J. Sternberg, Aleksandra Kostić, 2022-03-15 This book is an up to date compendium of knowledge on the secret language of close relationships namely nonverbal routes of communication In close relationships as everyone learns sooner or later the usefulness of words can be somewhat limited because people a mean different things by the same words b mean the same thing by different words c sometimes find it hard to express their feelings in words and d lie Nonverbal signals therefore often provide the best means of communication The book points out how decoding interpreting nonverbal signals is a major key to success because often what people say wholly belies how they feel nonverbal signals reveal their true feelings rather than what they want other people to think their feelings are This book helps decode those secret signals The book is written by the leading worldwide experts in the field of nonverbal

communication to ensure accuracy comprehensiveness and timeliness

Development of Nonverbal Behavior in Children R. S. Feldman, 2013-03-14 When I organized a symposium on the development of nonverbal behavior for the 1980 meeting of the American Psychological Association I was faced with an embarrassment of riches Thinking about the many people who were doing important and interesting research in this area it was hard to narrow down the choice to just a few Eventually I put together a panel which at least was representative of this burgeoning area of research In planning this volume two years later I was faced with much the same predicament except to an even larger degree For during that short period the area of children's nonverbal behavior came to grow even larger with more perspectives being brought to bear on the question of the processes involved in the development of children's nonverbal behavior The present volume attempts to capture these advances which have occurred as the field of children's nonverbal behavior has moved from its own infancy into middle childhood The book is organized into five major areas representative of the most important approaches to the study of children's nonverbal behavior 1 Psychobiological and ethological approaches 2 social developmental approaches 3 encoding and decoding skill approaches 4 discrepant verbal nonverbal communication approaches and 5 personality and individual difference approaches The discreteness of these categories should not be overemphasized as there is a good deal of overlap between the various approaches Nonetheless they do represent the major areas of interest in the field of the development of nonverbal behavior in children
