Richard Phelps, 2017-09-04 In response to public demand federal legislation now requires testing of most students in the
United States in reading and mathematics in grades three through eight Many educators parents and policymakers who have
paid little attention to testing policy issues in the past need to have better information on the topic than has generally been
available Kill the Messenger now in paperback fills this gap This is perhaps the most thorough and authoritative work in
defense of educational testing ever written Phelps points out that much research conducted by education insiders on the
topic is based on ideological preference or profound self interest It is not surprising that they arrive at emphatically anti
testing conclusions Much if not most of this hostile research is passed on to the public by journalists as if it were neutral
objective and independent Kill the Messenger explains and refutes many of the common criticisms of testing describes
testing opponents strategies through case studies of Texas and the SAT illustrates the profound media bias against testing
acknowledges testing s limitations and suggests how it can be improved and finally outlines the consequences of losing the
war on standardized testing Artificial Intelligence in Education Ning Wang, Genaro Rebolledo-Mendez, Noboru
