Supervision for Supervisors and Their Students: 2nd Edition Dan Remenyi, Arthur Money, 2012-03-01 Research degrees remain a challenge for both supervisors and the researchers whom they are trying to help. It is more challenging than ever to find a good doctoral programme and it is difficult to manage all the different facets of a research degree that have to be attended to. Not everyone who thinks it is a good idea to undertake a research degree will be successful and this book indicates the characteristics which are required to produce high quality academic research. The book explores a number of important issues including the nature of theory development in academic research and how positivist and interpretivist research functions. The book discusses in detail how masters and doctoral degrees are evaluated and gives tips on how to be sure that the examiners will be satisfied with both the dissertation and during the viva. This book offers sound advice to both supervisors and their students as to how to navigate their way through all the issues they have to face. In its second edition the book not only addresses the issues which have either changed or have developed since the first edition but it also contains additional material which the authors believe will be a direct help to supervisors and their students. **Australia's**

Music: Themes of a New Society (2nd ed.) Roger Covell, 2016-12-01 Described on its first publication in 1967 as a scholarly account of Australian music that is also entertaining social history, Roger Covell's *Australia's Music: Themes of a New Society* has become a classic of Australian music history for its beautifully written explorations of almost two hundred years of music making across classical, Indigenous and Anglo-Celtic traditions. This revised edition, including more than sixty musical examples, is supplemented by a new postscript written by the author. **Anaesthesia OSCE** G. Arthurs, K. M.

Elfituri, 2002-01-03 The Objective Structured Clinical Examination (OSCE) assesses key practical aspects of anaesthetic competence and forms a key part of the Primary examination of the Royal College of Anaesthetists. In the examination the candidate moves through a series of stations which test clinical assessment, data interpretation, communication and technical skills. This book helps the trainee to practise the examination. In the wider context it will also help the anaesthetist to develop essential practical skills such as history taking and communication which are an invaluable part of day to day anaesthetic practice. This new edition of the book has been expanded and updated to reflect recent changes to the OSCE examination.

Writing for Academic Journals Rowena Murray, 2013-09-01 Busy academics must publish. To fulfil research output they must write to a specific journal style and high standard while juggling other professional tasks. This book develops understanding of how writing happens, what good writing looks and feels like, what gets published and what does not, and why.
