natural light in three of his greatest achievements the small pilgrimage chapel at Ronchamp the Dominican monastery of Sainte Marie de La Tourette and the parish church of Saint Pierre in Firminy Vert all in France In these modest religious works Le Corbusier deploys light to create enchanted emotionally charged spaces wedded to the cosmic rhythm of sunlight and season Cosmos of Light reveals how the artist reimagined sacred space and charted new ways that buildings can both reveal and inhabit the universe around them

*The Experience of Architecture* Henry Plummer, 2016-12-01 How does the experience of turning a door handle opening a door from one space to lead into another affect us It is no wonder that the door one of the most elemental architectural forms has such metaphorical richness But even on a purely physical human level the cold touch of a brass handle or the swish of a sliding screen gives rise to an emotional reaction sometimes modest occasionally profound This book aims to understand how these everyday acts in space are influenced by architectural form a concept that is vital for all architects to grasp if our buildings are to be anything more than a commercial or aesthetic enterprise It considers how specific built elements and volumes taken from a wide array of buildings and settings around the world can sustain or deny our powers of decision From the hand carved stairs in Greek villages to free floating catwalks from the elegant processional steps of Renaissance Italy to Frank Lloyd Wrights masterly manipulation of form from the seemingly random placement of Japanese stepping stones to the staircase in Chareaus Glass House all provide very different experiences of stepping from one level to the next and all affect our experience of that space Each chapter focuses on a different aspect of our daily interactions with architecture looking at stairs floors and paths moving interior spaces perception and perspective

transparency and the relationship between a building and its setting This book is not just for architects and designers engaged in the production of space but for all those who seek a richer understanding of their place in the built world
