generalized by putting it in the context of elliptic curves and modular forms The main motivation for writing this book was the need for a total perspective of Iwasawa theory that includes the new trends of generalized Iwasawa theory Another motivation of this book is an update of the classical theory for class groups taking into account the changed point of view on Iwasawa theory The goal of this first part of the two part publication is to explain the theory of ideal class groups including its algebraic aspect the Iwasawa class number formula its analytic aspect Leopoldt Kubota L functions and the Iwasawa main conjecture which is a bridge between the algebraic and the analytic aspects The second part of the book will be published as a separate volume in the same series Mathematical Surveys and Monographs of the American Mathematical Society
