

Alberta Police Cognitive Ability Test (APCAT) Candidate Brochure¹

General Information about the APCAT

Q1. What does the APCAT measure?

A1. The APCAT test measures one's potential to successfully complete police recruit training and to perform effectively as a police officer in the province of Alberta.

Q2. How many questions are there?

A2. The test includes 120 multiple-choice questions.

Q3. How much time is allowed to write the test?

A3. Candidates are given 30 minutes to review a Pretest Study Booklet. They then are given 2 hours and 15 minutes to complete the test.

Q4. What do I need to do to prepare for the test?

A4. Unlike a highschool or university test, it is not necessary to study for the APCAT. The reason is that the APCAT does not measure your knowledge of a particular subject, but rather your ability to think and reason.

Q5. How do I arrange to take the test?

A5. If you need to write the APCAT as part of the application process for a particular police agency, that agency will inform you of where and when you can write the APCAT.

¹ This brochure is provided to prospective APCAT candidates to address common questions they may have about the test. However, the material in this brochure does not give the reader an advantage over someone who has not read the brochure. Therefore, it is not essential, nor necessary, that candidates receive or read this brochure in advance of taking the APCAT.

Psychology and Policing Neil Brewer, Carlene Wilson, 2013-06-17 Psychological theory and research have much to contribute to the knowledge and skill bases underlying effective policing. Much of the relevant information, however, is dispersed across a variety of different psychological and criminal justice policing journals and seldom integrated for those applied psychologists interested in policing issues or for police policymakers, administrators, and others working in the criminal justice area who are not familiar with the psychological literature. Designed to accommodate the needs of these different groups, this book addresses both operational policing issues and issues relevant to the improvement of organizational functioning by providing integrative reviews of psychological theory and research that deal with effective policing. It illustrates how the theory and research reviewed are relevant to specific policing practices. These include eyewitness testimony, conflict resolution, changing driver behavior, controlling criminal behavior, effective interviewing, and techniques of face reconstruction. The volume's readable style makes it accessible to a diverse audience, including undergraduate and postgraduate students in forensic, organizational, applied psychology, criminal justice, and police science programs, and police administrators and policymakers. It will also interest psychologists whose primary focus includes policing and criminal justice issues. The book should draw attention to the often unrecognized and valuable contribution that mainstream psychology can make to the knowledge base underpinning a wide variety of policing practices.
