Car Radar System,From Design to License Plate Recognition Iyad Shaheen,2012-02-05 Over the past years Egypt has

been experiencing a terrifying rate of highway accidents. These accidents have risen to a very high rate over the past years. That a new system of traffic regulation must be used instead of the inefficient methods we currently have in use. Highways accidents obviously have very negative effects and many people get hurt in the process or even die. Therefore it is very important to have a new efficient system that will decrease the rate. Deaths per 100 million vehicle kilometers. Rate an international comparison safety indicator. Countries. The study estimated that in 1999 between 750 000 and 880 000 people died from road crashes on the highway due to over speed. The idea of our project is to use radar system for detecting the speed of the cars and capture the overspeeding cars to extract its numbers and send it to the related authority.

Laser-Plasma Acceleration Società italiana di fisica, 2012-09-18 Impressive progress has been made in the field of laser plasma acceleration in the last decade with outstanding achievements from both experimental and theoretical viewpoints. Closely exploiting the development of ultra intense ultrashort pulse lasers laser plasma acceleration has developed rapidly achieving accelerating gradients of the order of tens of GeV/m and making the prospect of miniature accelerators a more realistic possibility. This book presents the lectures delivered at the Enrico Fermi International School of Physics and summer school Laser Plasma Acceleration held in Varenna Italy in June 2011. The school provided an opportunity for young scientists to experience the best from the worlds of laser plasma and accelerator physics with intensive training and hands on opportunities related to key aspects of laser plasma acceleration. Subjects covered include the secrets of lasers the power of numerical simulations beam dynamics and the elusive world of laboratory plasmas. The objective of the school was to establish a common knowledge base for the future laser plasma accelerator community. These published proceedings aim to provide a wider community with a reference covering a wide range of topics knowledge of which will be necessary to future research on laser plasma acceleration. The book also provides references to selected existing literature for further reading.
