Choosing and Using a New CAT Rod Mollise,2009-02-28 Choosing and Using the New CAT will supersede the author's successful Choosing and Using a Schmidt Cassegrain Telescope which has enjoyed enthusiastic support from the amateur astronomy community for the past seven years Since the first book was published a lot has changed in the technology of amateur astronomy The sophistication and variety of the telescopes available to amateurs has increased dramatically Computerized SCTs Maksutov Cassegrains and most recently Meade's new and acclaimed Ritchey Chr tiens have come to dominate the market That means that all amateurs considering the purchase of a new telescope not only a SCT and not just beginners will benefit from this detailed guide Choosing the right telescope for particular kinds of observation or even for general work is far from easy but Rod Mollise gives invaluable advice and guidance **Environmental Education and Information** ,2000 Marine Corps Combat Readiness Evaluation System United States. Marine Corps,1992 **Imagined Geographies** Geoffrey C. Gunn,2021-09-03 Imagined Geographies is a pioneering work in the study of history and geography of the pre 1800 world In this book Gunn argues that different regions astride the maritime silk roads were not only interconnected but can also be construed as imagined geographies Taking a grand civilizational perspective five such geographic imaginaries are examined across respective chapters namely Indian Arabic Chinese Japanese and European including an imagined Great South Land Drawing upon an array of marine and other archaeological examples the author offers compelling evidence of the intertwining of political cultural and economic regions across the sea silk roads from ancient times until the seventeenth century Through a thorough analysis of these five geographic imaginaries the author sets aside purely national history and looks at the maritime realm from a broader spatial perspective He challenges the Eurocentric concept of center and periphery and establishes a revisionist view on a decentered world regional history This book will definitely interest history lovers from all around the world who want to know more about how their forebears viewed their respective region and how their region fits into world history with local uniqueness Gunn takes large themes and makes them understandable He is not afraid to make the grand statement and to look at the sweep of history all in one arc I admire that greatly this is not history for the faint of heart But it is history well done and history that can show the forest from the trees Eric Tagliacozzo John Stambaugh Professor of History Cornell University This is one of the most ambitious and insightful books that I have read on pre Modern maritime Asia The author offers fascinating perspectives on how this vast region was imagined charted and experienced over many centuries That requires mastery of an immense range of scholarship and primary sources His aim is to knit this watery world together into a conceptual whole This mission is accomplished with style and discipline Andrew R Wilson John A van Beuren Chair of Asia Pacific Studies U S Naval War
