Poles Apart The Great Climate Change Debate:

Poles Apart Gareth H. T. Morgan, John McCrystal, 2009 Gareth Morgan couldn't decide whether he believed in climate change or not so he hired the best international scientists to answer his questions and these are his findings Combined with anecdotes from his own recent trips to Antarctica and the Arctic this is something completely unique in books about climate change somebody who has approached the topic with an open mind somebody who has the resources to explore such a topic and somebody who has personally investigated all of the issues So what was his conclusion Read the book to find out In conjunction with excellent researcher and writer Dr John McCrystal this is an accessible and fascinating exploration of one of the biggest topics of the 21st century This book defines climate change explains the science of taking the earth's temperature looks at the respective cases of the alarmists and the sceptics examines the anecdotal evidence and the politics of this dialogue and then comes to a conclusion based on all this research *How Culture Shapes the Climate Change Debate*

Andrew J. Hoffman, 2015-03-11 Though the scientific community largely agrees that climate change is underway debates about this issue remain fiercely polarized These conversations have become a rhetorical contest one where opposing sides try to achieve victory through playing on fear distrust and intolerance At its heart this split no longer concerns carbon dioxide greenhouse gases or climate modeling rather it is the product of contrasting deeply entrenched worldviews This brief examines what causes people to reject or accept the scientific consensus on climate change Synthesizing evidence from sociology psychology and political science Andrew J Hoffman lays bare the opposing cultural lenses through which science is interpreted He then extracts lessons from major cultural shifts in the past to engender a better understanding of the problem and motivate the public to take action *How Culture Shapes the Climate Change Debate* makes a powerful case for a more scientifically literate public a more socially engaged scientific community and a more thoughtful mode of public discourse

Poles Apart Alison Goldsworthy, Laura Osborne, Alexandra Chesterfield, 2021-09-09 Why do people become divided What steps can we all take to reduce hostility and bring about understanding *Poles Apart* has the answers In *Poles Apart* an expert on polarisation a behavioural scientist and a professional communicator explain why we are so prone to be drawn into rival often deeply antagonistic factions They explore the shaping force of our genetic make up on our fundamental views and the nature of the influences that family friends and peers exert They pinpoint the economic and political triggers that tip people from healthy disagreement to dangerous hostility and the part played by social media in spreading entrenched opinions And they help us to understand why outlooks that can seem so bizarre and extreme to us seem so eminently sensible to those who hold them Above all they show what practical and effective steps we can all take to narrow divisions build respect for others and create a greater degree of common understanding _____ *Poles Apart* is an extraordinary achievement fresh deeply authoritative and entertaining on every page Everyone talks about polarisation but no one does it like Goldsworthy Osborne and Chesterfield You'll finish this book wiser kinder and more hopeful than when

you started it Jamie Susskind author of Future Politics A fascinating and thought provoking analysis of the divisions between us how we bridge them how we reshape the world and ourselves too Essential reading Cathy Newman presenter of Channel 4 News and author Asks the best question I have ever heard And critically offers solutions A must read Rory Sutherland Vice Chairman of Ogilvy UK and author of Alchemy Technology may have connected the world but it s now being exploited to divide and polarise us This is a pivotal moment for this book to be written read and understood Peter Gabriel musician

The Role of Language in the Climate Change Debate Kjersti Flottum,2017-03-03 This volume takes a distinctive look at the climate change debate already widely studied across a number of disciplines by exploring the myriad linguistic and discursive perspectives and approaches at play in the climate change debate as represented in a variety of genres The book focuses on key linguistic themes including linguistic polyphony lexical choices metaphors narration and framing and uses examples from diverse forms of media including scientific documents policy reports op eds and blogs to shed light on how information and knowledge on climate change can be represented disseminated and interpreted and in turn how they can inform further discussion and debate Featuring contributions from a global team of researchers and drawing on a broad array of linguistic approaches this collection offers an extensive overview of the role of language in the climate change debate for graduate students researchers and scholars in applied linguistics environmental communication discourse analysis political science climatology and media studies

Poles Apart Antoni G. Lewkowicz,1999 Poles Apart covers a range of themes about the Arctic and Antarctic including the geography glaciology and glacial history ecology living resources governance and history of exploration Topics are examined separately for each pole and each theme is summarized by a rapporteur who draws out the contrast and the similarities This unique format allows the international experts to describe what they know best while addressing the central issues of the book Published in English

Communicating Climate Science - HC 254 Great Britain. Parliament. House of Commons. Select Committee on Science and Technology,Great Britain: Parliament: House of Commons: Science and Technology Committee,Andrew Miller,2014-04-02 The Government is failing to clearly and effectively communicate climate science to the public There is little evidence of co ordination amongst Government government agencies and public bodies on communicating climate science despite various policies at national and regional level to mitigate and adapt to climate change The mandate to act on climate can only be maintained if the electorate are convinced that the Government is acting on the basis of strong scientific evidence Ministers therefore need to do more to demonstrate that is the case and consistently reflect the Government approach in all their communications especially with the media The report also criticises the BBC for its reporting on the issue It points out that BBC News teams continue to make mistakes in their coverage of climate science by giving opinions and scientific fact the same weight The BBC is called to develop clear editorial guidelines for all commentators and presenters on the facts of climate that should be used to challenge statements from either side of the climate policy debate that stray too far from the scientific facts It is

important that climate science is presented separately from any subsequent policy response Government should work with the learned societies and national academies to develop a source of information on climate science that is discrete from policy delivery comprehensible to the general public and responsive to both current developments and uncertainties in the science

The Space of the World Nick Couldry, 2024-09-17 Over the past thirty years humanity has made a huge mistake We handed over to big tech decisions that have allowed them to build what has become our space of the world the highly artificial space of social media platforms where much of our social life now unfolds This has proved reckless and has huge social consequences The toxic effects on social life young people s mental health and political solidarity are well known but the key factor underlying all this has been missed the fact that humanity allowed business to construct our space of the world at all and then exploit it for profit In the process we ignored two millennia of political thought about the conditions under which a healthy or even a non violent politics is possible We endangered the one resource that is in desperately short supply in the face of catastrophic climate change solidarity Is human solidarity possible in a world of continuous digital connection and commercially managed platforms and what if it isn t In the first book of his trilogy Humanising the Future Nick Couldry offers a radical new vision of how to design our digital spaces so that they build rather than erode both solidarity and community This trenchant and vividly written book stresses that we cannot afford not to care for our space of the world We need to rebuild it together

Exploring Climate Change through Science and in Society Mike Hulme, 2013-09-11 Mike Hulme has been studying climate change for over thirty years and is today one of the most distinctive and recognisable voices speaking internationally about climate change in the academy in public and in the media The argument that he has made powerfully over the last few years is that climate change has to be understood as much as an idea situated in different cultural contexts as it is as a physical phenomenon to be studied through universal scientific practices Climate change at its core embraces both science and society both knowledge and culture Hulme s numerous academic and popular writings have explored what this perspective means for the different ways climate change is studied narrated argued over and acted upon Exploring Climate Change through Science and in Society gathers together for the first time a collection of his most popular prominent and controversial articles essays speeches interviews and reviews dating back to the late 1980s The 50 or so short items are grouped together in seven themes Science Researching Culture Policy Communicating Controversy Futures and within each theme are arranged chronologically to reveal changing ideas evidence and perspectives about climate change Each themed section is preceded with a brief introduction drawing out the main issues examined Three substantive unpublished new essays have been specially written for the book including one reflecting on the legacy of Climategate Taken as a collection these writings reveal the changes in scientific and public understandings of climate change since the late 1980s as refracted through the mind and expression of one leading academic and public commentator The collection shows the many different ways in which it is necessary to approach the idea of climate change to interpret and make sense of the

divergent and discordant voices proclaiming it in the public sphere *What Should Individuals Do about Climate Change?* Marion Hourdequin, Dan C. Shahar, 2025-06-10 Climate change is a pressing problem Does each of us have a moral responsibility to help tackle it In this volume Marion Hourdequin and Dan Shahar debate the timely issue of individual behavior and climate change examining what it takes to live morally in a warming world Hourdequin argues there are important reasons for people to translate their concerns about climate change into actions in their personal lives This includes attending to the many ways a single individual can help catalyze systemic change through choices about voting and political participation food and clothing energy use travel and so on Shahar disagrees because he endorses moral specialization and division of labor in a world filled with many problems He argues we should not expect everyone to take action on every serious issue rather it is acceptable and even desirable for people to focus on certain issues and decline to act on others including climate change The two authors take turns responding to each other and then defending their ultimate conclusions This volume is sure to draw attention to the question of individual choice in climate change debates and to help clarify some of the best thinking on this issue Key Features Refocuses attention from big picture debates over the actions of nations and corporations to more tractable questions about individual choices Examines whether there are good reasons to structure our daily lives to reduce our impacts on the climate Explores whether it would be best if individuals became moral specialists by focusing on a small number of problems while declining to act on many others Is highly accessible with clear language and an easy to follow format Provides a glossary of key terms that are bolded in the main text Includes section summaries that give an overview of the main arguments and a comprehensive bibliography for further reading **Big Business, Big Responsibilities** A. Wales, M. Gorman, D. Hope, 2016-04-30 Big business is often seen as the villain in terms of the environment or social wellbeing But some leading businesses are becoming leaders in the fight against climate change and protectors of human rights This book explains why this is now a core part of strategy and not just philanthropy for these businesses Communicating Climate Change and Energy Security Greg Philo, Catherine Happer, 2013-10-15 This book drawing on new research conducted for the UK Energy Resource Centre UKERC examines the contemporary public debate on climate change and the linked issue of energy security It analyses the key processes which affect the formation of public attitudes and understanding in these areas while also developing a completely new method for analysing these processes The authors address fundamental questions about how to adequately inform the public and develop policy in areas of great social importance when public distrust of politicians is so widespread The new methods of attitudinal research pioneered here combined with the attention to climate change have application and resonance beyond the UK and indeed carry global import **Confronting Climate Change** Constance Lever-Tracy, 2011-03-30 In this highly accessible introduction to the predicted global impacts of climate change Constance Lever Tracy provides an authoritative guide to one of the most controversial issues facing the future of our planet Discussing how the social and natural sciences

must work together more effectively in confronting climate change

Lever Tracy provides a sober critical assessment of the politics of global warming and climate change

When Black and White Become Gray Richard Kay, 2010-04

WHEN BLACK AND WHITE BECOME GRAY Whether we talk about Right from Wrong Good from Evil Black and White in contradiction of Gray Capitalism in opposition to Socialism Conservatives in opposition to Liberalism Humanism Secularism or Naturalism versus Christianity and leading the horde Atheism opposing all and anyone believing in the Christian values of the originator Jesus Christ as taken from Scriptures of the Holy Bible and formed into our Constitution The lack of legitimate authority caused by the denial of God reinforces the Christian s belief that God must be recognized as ruler in every sphere including local and federal governmental politics We are now seeing violations taking hold in this 21st century by men who want new awe inspiring laws that bind man to authority with exception of mans pleasure fitness or convenience which is not binding at all The twentieth century should have taught Americans that even the most basic of human rights cannot exist yet again and again apart from an absolute Christian standard This standard is given to you in this book Who is sovereign and to whom is man responsible to This source of sovereignty resides only in following Jesus Christ and has been for over two hundred and thirty four years in America and is still if we in simple terms want this very source of American freedom But if sovereignty resides in government whether a monarchy or a democracy behaving in an overbearing dictatorial way man has no appeal beyond the law of the state and has no source of Christian truths principles and ethics Leading only into oppression and totalitarianism Freedom first of all is a question of self determination and responsibility In the two years it took to do research study and having the strength or tendency to condense not by opinion but by history common sense and reality regarding Capitalism Atheism Socialism and the strategy used by Marxists liberals to overthrow our American freedoms

Climate Change, second edition Joseph F.C. Dimento, Pamela Doughman, 2014-03-21 An updated and accessible account of what science knows about climate change incorporating the latest scientific findings and policy initiatives Most of us are familiar with the term climate change but few of us understand the science behind it We don t fully comprehend how climate change will affect us and for that reason we might not consider it as pressing a concern as say housing prices or unemployment This book explains the scientific knowledge about global climate change clearly and concisely in engaging nontechnical language describes how it will affect all of us and suggests how government business and citizens can take action against it This completely revised and updated edition incorporates the latest scientific research and policy initiatives on climate change It describes recent major legislative actions analyzes alternative regulatory tools including new uses of taxes and markets offers increased coverage of China and other developing nations discusses the role of social media in communicating about climate change and provides updated assessments of the effects of climate change The book first explains the basic scientific facts about climate change and its global impact It discusses the nature of scientific consensus and the strong consensus of mainstream science on climate change It then explores policy responses and corporate actions in

the United States and the rest of the world discusses how the communication of climate change information by journalists and others can be improved and addresses issues of environmental justice how climate change affects the most vulnerable populations and regions We can better tackle climate change this book shows us if we understand it *The Polar Regions and the Development of International Law* Donald Rothwell,1996-11-13 A review of international law in the polar regions and its importance to the environment and to international relations *Climate Change in the Media* James Painter,2013-08-19 Scientists and politicians are increasingly using the language of risk to describe the climate change challenge Some researchers have argued that stressing the risks posed by climate change rather than the uncertainties can create a more helpful context for policy makers and a stronger response from the public However understanding the concepts of risk and uncertainty and how to communicate them is a hotly debated issue In this book James Painter analyses how the international media present these and other narratives surrounding climate change He focuses on the coverage of reports by the Intergovernmental Panel on Climate Change IPCC and of the melting ice of the Arctic Sea and includes six countries Australia France India Norway the UK and the USA **Survival for a Small Planet** Tom Bigg,2013-06-17 Few scientific developments have given rise to as much controversy as biotechnology Numerous groups are united in their opposition expressing concern over environmental and health risks impacts on rural livelihoods the economic dominance of multinational companies and the ethical implications of crossing species boundaries Among the supporters of the technology are those that believe in its potential to enhance food security further economic development increase productivity and reduce environmental pressures As a result countries and sectors within countries find themselves at odds with each other while potential opportunities for development offered by the use of biotechnology are seized or missed and related risks go unmanaged This book a unique interdisciplinary collection of perspectives from the developing world examines the ongoing debate Writing for the International Centre for Trade and Sustainable Development leading experts address issues such as diffusion of technology intellectual property rights the Cartagena Protocol impacts of international trade capacity building and biotechnology research and regulation With the most recent and relevant examples from around the world Trading in Genes offers the reader a single volume overview of the connections between biotechnology trade and sustainability that is both wide ranging and thorough *Evidence-based science communication in the COVID-19 era* Eric A. Jensen,Axel Pflieger,Tuo Chen,Alexander Gerber,Jessica Norberto Rocha,2023-10-26 Antarctic Environments and Resources J.D. Hansom,John Gordon,2014-06-03 Antarctica is no longer a pole apart From a scientific perspective the Antarctic ice sheet ocean and climate systems are intimately linked with the global climate and are now seen to be of international significance for understanding climate change From an economic perspective the Antarctic is perceived to have great potential as a source of marine resources although the extent of speculated mineral and hydrocarbon resources is unknown From a conservation perspective the continent of Antarctica represents the ideal image of unspoiled wilderness Antarctic

Environments and Resources is an accessible and timely new geography of the Antarctic which examines the differing and sometimes conflicting interests in the great southern continent the Southern Ocean and the subantarctic islands against a background of the physical and natural systems of the region and their interactions It charts the development of human involvement in the area focusing on the exploitation of resources from early sealing to modern fisheries tourism and science and it assesses the consequent impacts on the natural environment The text also reviews the emerging framework for future environmental management developed under the Antarctic Treaty System This is an ideal text for undergraduates studying glacial geomorphology environmental management polar regions and the Antarctic

Handbook on the Politics of Antarctica Klaus Dodds, Alan D. Hemmings, Peder Roberts, 2017-01-27 The Antarctic and Southern Ocean are hotspots for contemporary endeavours to oversee the last frontier of the Earth The Handbook on the Politics of Antarctica offers a wide ranging and comprehensive overview of the governance geopolitics international law cultural studies and history of the region Four thematic sections take readers from the earliest human encounters to contemporary resource exploitation and climate change Written by leading experts the Handbook brings together the very best interdisciplinary social science and humanities scholarship on the Antarctic and Southern Ocean

Poles Apart The Great Climate Change Debate: Bestsellers in 2023 The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the fascinating narratives that have enthralled audiences this year. Poles Apart The Great Climate Change Debate : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Uncover the Best : Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Poles Apart The Great Climate Change Debate : Delia Owens' "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and suspenseful novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
