Zimsec Paper 3 Biology:

School Science Practical Work in Africa Umesh Ramnarain, 2020-06-01 School Science Practical Work in Africa presents the scope of research and practice of science practical work in African schools. It brings together prominent science educators and researchers from Africa to share their experience and findings on pedagogical innovations and research informed practices on school science practical work. The book highlights trends and patterns in the enactment and role of practical work across African countries. Practical work is regarded as intrinsic to science teaching and learning and the form of practical work that is strongly advocated is inquiry based learning which signals a definite paradigm shift from the traditional teacher dominated to a learner centered approach. The book provides empirical research on approaches to practical work, contextual factors in the enactment of practical work and professional development in teaching practical work. This book will be of great interest to academics, researchers and post graduate students in the fields of science education and educational policy.

Private Wildlife Conservation in Zimbabwe Harry Wels, 2021-11-08 This book is the first about private wildlife conservation and community involvement in Zimbabwe. It is a case study based on ethnographic fieldwork done in 1998. It focuses on the joint venture between a private wildlife conservation initiative, the Save Valley Conservancy, and its surrounding communities in terms of reciprocal exchange and the land question. It makes clear amongst other things that the current political tragedy in Zimbabwe about land did not start when Mugabe lost the referendum in February 2000. The book tries to offer an explanation for the unforgiving route that Mugabe has obviously taken in the land question despite his words of reconciliation when he came to power in 1980. This book is of particular interest to students, practitioners and academics in the fields of private wildlife conservation, community participation and organisational co-operation.

Directory of African Environmental Experts and List of Institutions, 1996 **GMOs** Anurag Chaurasia, David L. Hawksworth, Manoela Pessoa de Miranda, 2020-11-30 This book covers a broad spectrum of topics related to GMOs and allied new gene based technologies, biodiversity and ecosystem processes, bringing together the contributions of researchers and regulators from around the world. The aim is to offer a clear view of the benefits and effects of genetically modified crops, insects and other animals on the soil microbiome and ecological processes. Contributors examine issues related to the development of risk assessment procedures and regulations designed to maximize benefits while minimizing risks. Beyond the scientific challenges of GMOs, the book explores the broad and contentious terrain of ethical considerations. The contributors discuss such questions as the unintended, possibly unforeseen consequences of releasing GMOs into ecosystems and the likelihood that the full effects of GMOs could take years, even decades, of close monitoring to become evident. The importance of developing a precautionary approach is stressed. The final chapter describes the critical issues of governance and regulation of new and emerging gene based technologies as nations grapple with the consequences of adopting the Cartagena Protocol on Biosafety (CPB). The volume includes an extensive Annex which outlines legal perspectives on the state

of GMO governance around the world with more than 20 examples from nations in Africa South and Central America Asia Australasia and Europe *Wetlands Ecology and Priorities for Conservation in Zimbabwe* T. Matiza, S. A. Crafter, 1994
