The Long Tail How Endless Choice Is Creating Unlimited Demand:

The Long Tail Chris Anderson, 2007 What happens when there is almost unlimited choice When everything becomes available to everyone And when the combined value of the millions of items that only sell in small quantities equals or even exceeds the value of a handful of best sellers In this ground breaking book Chris Anderson shows that the future of business does not lie in hits the high volume end of a traditional demand curve but in what used to be regarded as misses the endlessly long tail of that same curve As our world is transformed by the Internet and the near infinite choice it offers consumers so traditional business models are being overturned and new truths revealed about what consumers want and how they want to get it Chris Anderson first explored the Long Tail in an article in Wired magazine that has become one of the most influential business essays of our time Now in this eagerly anticipated book he takes a closer look at the new economics of the Internet age showing where business is going and exploring the huge opportunities that exist for new producers new e tailers and new tastemakers He demonstrates how long tail economics apply to industries ranging from the toy business to advertising to kitchen appliances He sets down the rules for operating in a long tail economy And he provides a glimpse of a future that s already here publishers description

The Long Tail Chris Anderson, 2006 The concept of the long tail refers to the hundreds of products that are not bestsellers i e those products that form a line that tails off down any company s sales graph This book looks at how the Internet has allowed for a boom in such niche market products

The Long Tail Chris Anderson, 2006 Like the tipping point the long tail is a concept that is so obvious and so right that it seems extraordinary that no one has articulated it before The long tail refers to the hundreds of thousands of products that are not number one bestsellers If you were to plot a graph of a company s products ranging them from the bestselling to the least popular along the bottom axis and plotting sales figures against the vertical axis then you d see the line sort of tailing off as products become less popular The bestsellers may sell in their thousands but others sell only in hundreds or maybe even tens However there are so many of these products that if you add up their total sales they are quite often more profitable than bestsellers These products from the part of the sales graph that tails off are the long tail and these products are changing the face of the entertainment industry When Chris Anderson identified this trend in Wired magazine in the autumn of 2004 he explained how in an era of almost limitless choice many consumers will gravitate toward the most popular mass market items but just as many will move toward items that only a few niche market people want Take music in an age of Amazon com and iTunes A lot of music buyers want the hot new releases But just as many buy music by lesser known artists or older music songs that record stores never would be able to carry but that can be offered online All that niche market off mainstream music is part of the long tail and makes a significant

contribution to profits In this new digital era the long tail is a powerful force that is challenging the might of the mass market

Making is Connecting David Gauntlett,2013-04-29 In Making is Connecting David Gauntlett argues that through making things people engage with the world and create connections with each other Both online and offline we see that people want to make their mark on the world and to make connections During the previous century the production of culture became dominated by professional elite producers But today a vast array of people are making and sharing their own ideas videos and other creative material online as well as engaging in real world crafts art projects and hands on experiences Gauntlett argues that we are seeing a shift from a sit back and be told culture to a making and doing culture People are rejecting traditional teaching and television and making their own learning and entertainment instead Drawing on evidence from psychology politics philosophy and economics he shows how this shift is necessary and essential for the happiness and survival of modern societies *The Oxford Handbook of Internet Studies* William H.
