**Migrant City** Panikos Panayi, 2020-04-07 The first history of London to show how immigrants have built shaped and made a great success of the capital city London is now a global financial and multicultural hub in which over three hundred languages are spoken But the history of London has always been a history of immigration Panikos Panayi explores the rich and vibrant story of London from its founding two millennia ago by Roman invaders to Jewish and German immigrants in the Victorian period to the Windrush generation invited from Caribbean countries in the twentieth century Panayi shows how migration has been fundamental to London s economic social political and cultural development Migrant City sheds light on the various ways in which newcomers have shaped London life acting as cheap labour contributing to the success of its financial sector its curry houses and its football clubs London s economy has long been driven by migrants from earlier continental financiers and more recent European Union citizens Without immigration fueled by globalization Panayi argues London would not have become the world city it is today *Steering the Metropolis* Inter American Development Bank, United Nations Human Settlements Programme, Development Bank of Latin

providing coverage of Latin America and Africa India and China and the US and Europe Includes biographies of central figures in urban and regional studies such as Doreen Massey Peter Hall Neil Smith and Henri Lefebvre The Wiley Blackwell Encyclopedia of Urban and Regional Studies is an indispensable reference for students and researchers in urban and regional studies urban sociology urban geography and urban anthropology      Migration and the European City Christoph Cornelißen, Beat Kümin, Massimo Rospoche, 2022-03-07 Looking back over the centuries migration has always formed an important part of human existence Spatial mobility emerges as a key driver of urban evolution characterized by situation specific combinations of opportunities restrictions and fears This collection of essays investigates interactions between European cities and migration between the early modern period and the present Building on conceptual approaches from history sociology and cultural studies twelve contributions focus on policies representations and the impact on local communities more generally Combining case studies and theoretical reflections the volume s contributions engage with a variety of topics and disciplinary perspectives yet also with several common themes One revolves around problems of definition both in terms of demarcating cities from their surroundings and of distinguishing migration in a narrower sense from other forms of short and long distance mobility Further shared concerns include the integration of multiple analytical scales contextual factors and diachronic variables such as urbanization industrialization and the digital revolution      **The UK Regional-National Economic Problem** Philip McCann, 2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain s regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK s economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government      Destination London Andrew Smith, Anne Graham, 2019-05-21 London is one of the world s most popular destinations and visitors contribute approximately 14.9 billion of expenditure to the city every year Its tourism and

events sectors are growing and over the last few years London has received more visitors than ever before. However, detailed accounts of the city's visitor economy are conspicuously absent. This book analyses how the capital is developing as a destination through the expansion of tourism and events into new urban spaces. The book outlines how parts of London not previously regarded as tourist territory are now subject to the visitor gaze, with tourism spreading beyond established central zones into peripheral suburban and residential areas, in part propelled by a big rise in peer-to-peer accommodation use. Simultaneously, London's airports and sports stadiums and their surrounds are becoming destinations in their own right. New vantage points have been created, allowing tourists to explore the city from above at night time or through tours given by the homeless via the opening up of the River Thames or through the transformation of local parks into eventscapes. The book explores these trends and shows how urban destinations expand. In doing so, it enhances our understanding of London and highlights the growing significance of tourism and events in global cities.

*The Desecularisation of the City* David Goodhew, Anthony-Paul Cooper, 2018-09-21. Major cities have long been seen as centres of secularisation. However, the number of congregations in London grew by 50% between 1979 and the present. London's churches have been characterised more by growth than by decline in the decades since 1980. *The Desecularisation of the City* provides the first academic survey of churches in London over recent decades, linking them to similar developments in other major cities across the West. Produced by a large team of scholars from a range of disciplines, this volume offers a striking and original portrait of congregational life in London since 1980. Seventeen chapters explore the diverse localities, ethnicities and denominations that make up the church in contemporary London. The vitality of London's churches in the last four decades shows that secularisation is far from inevitable in the cities of the future. This study necessitates a significant reassessment of the dominant academic portrayal of Christianity in Britain and the West, which has mostly depicted cities as secular spaces within a secularising culture. It will be of great interest to scholars working across a wide range of disciplines, including history, sociology, religious studies and theology.

**The story of your city** Greg Clark, Tim Moonen, Jake Nunley, 2018-10-31. By the end of this century, 9 out of 10 Europeans will live in an urban area. But what kind of city will they call home? You'll find all the answers in *CITY TRANSFORMED*, the new essay series from the European Investment Bank. This panoramic first essay in the series lays out a great sweeping history of European cities over the last fifty years and showcases new directions being taken by some of our most innovative cities. post industrial decline to thriving metropolises that are as prosperous and liveable as anywhere on Earth      **Global Cities**

Calder, 2021-01-26 Why cities often cope better than nations with today's lightning fast changes The British Empire declined decades ago but London remains one of the world's preeminent centers of finance commerce and political discourse London is just one of the global cities assuming greater importance in the post cold war world even as many national governments struggle to meet the needs of their citizens *Global Political Cities* shows how and why cities are re asserting their historic role at the forefront of international economic and political life The book focuses on fifteen major cities across Europe Asia and the United States including New York London Tokyo Brussels Seoul Geneva and Hong Kong not to mention Beijing and Washington D C In addition to highlighting the achievements of high profile mayors the book chronicles the growing influence of think tanks mass media and other global agenda setters in their local urban political settings It also shows how these cities serve in the Internet age as the global stage for grassroots appeals and protests of international significance *Global Political Cities* shows why cities cope much better than nations with many global problems and how their strengths can help transform both nations and the broader world in future The book offers important insights for students of both

international and comparative political economy diplomats and other government officials executives of businesses with global reach and general readers interested in how the world is changing around them *London: Mobility City* Greg Clark, Tim Moonen, Jake Nunley, 2018-11-16 Despite the uncertainties of Brexit London continues to be rated as a leading location in Europe and the world for business knowledge and talent But 30 years ago when London had no citywide government a transport system in crisis and no successful track record of continuous large scale upgrades to the urban fabric this scenario would have seemed highly unlikely In this essay we examine how London's unpromising 1980s gave rise to three decades of reinvestment and we explain how the European Investment Bank played an essential catalytic role in successive cycles of London's evolution from an under governed de populating national capital into a diverse global centre benefiting from integrated urban systems management **Saving Britain** Will Hutton, Andrew Adonis, 2018-06-07 Britain's Brexit voters are right They have been shamefully neglected But the answer is to change Britain not to leave Europe This book sets out how we can radically improve the lives of people and communities shut out from prosperity The EU despite its frailties and strains is a success story The advantages of leaving are illusory no gains in trade from deals with protectionist China and the United States can compensate for what is being lost in Europe Britain is weakening a pillar of the world's diplomatic and trade order at the same time as weakening itself an act of self harm especially when so many countries are retreating from democracy free trade and progressive values In *Saving Britain* Will Hutton and Andrew Adonis set out a bold plan to transform Britain and fight for Europe as a force for good at home and abroad **The EIB in the city: Investment on the agenda** Greg Clark, Tim Moonen, Jake Nunley, 2019-11-04 City transformed has shown how Europe's cities have developed over the last 50 years The European Investment Bank has adapted alongside them building a greater more focused role in urban development that takes it into truly innovative areas Future cities need to face up to challenges in climate productivity knowledge social mobility and resilience Here's how the EU bank is setting up to be a partner on that path

**Governing Complex City-Regions in the Twenty-First Century** Philip Harrison, 2023-11-01 Explores the challenges of large complex institutionally fragmented and dynamic city regions across the BRICS countries and the emergence of formal and informal governance arrangements *Contemporary European Science Fiction Cinemas* Aidan Power, 2018-08-14 *Contemporary European Science Fiction Cinemas* charts the evolution of European science fiction cinema in the 21st century a period in which Europe itself has faced myriad crises Key to this study is an exploration of how European science fiction responds to prevalent issues such as the financial crisis political extremism and violence large scale migration and indeed the potential breakup of the European Union itself What futures does science fiction cinema envision for Europe Is it capable of moving beyond dystopian visions of a continent beset by seemingly omnipresent turbulence Emphasising science fiction's unique ability to estrange exploit and reflect upon popular concerns this book directly engages with such questions accounting for ongoing mutations in the very nature of the European project as it does so
