11. (c)
12. (d) Momentum will increase by  $2 \times 2$ , and kinetic energy by  $2 \times 2^2$ .
13. (d)
14. (d)
15. (c)
16. (d) Some energy is lost to thermal energy of the collision.
17. (b) The momentum is  $p = \sqrt{2mE_K}$  so  $p \propto \sqrt{E_K}$ .
18. (c) M only stops, while T must continue to act on R to give it momentum in the opposite direction.
19. (a) They have both stopped, so the total momentum is zero, but the initial kinetic energy is stored as electric potential.
20. (d)

$$21. (a) \quad mv + (2m)\left(\frac{1}{2}(-v)\right) = (m + 2m)v'$$

$$v' = \frac{mv - mv}{3m}$$

$$v' = 0$$

$$22. (d) \quad 0 = mv - (M + m)V'$$

$$V' = \frac{mv}{M + m}$$

## CHAPTER 5 REVIEW

(Pages 269–271)

### Understanding Concepts

1. Impulse is the product of the force and the time. A smaller force exerted over a long period of time can impart a larger impulse than a large force for a short time.
2. As the meteor comes to a stop, the kinetic energy is converted into thermal energy which melts the material at the impact site.
3. This observation does not contradict the law of conservation of momentum. The momentum of the earth increases toward the falling object. The amount of change in the earth's velocity is so small it is imperceptible, so it appears the law of conservation is being contradicted, but it is not.
4. The change in momentum of the ball that bounces is greater than the putty that sticks to the floor. Assuming both have the same mass and are dropped from the same height:

For the putty,

$$\Delta p = m(v_2 - v_1)$$

$$= m(0 - v_1)$$

$$\Delta p = -mv_1$$

For the ball

$$\Delta p = m(v_2 - v_1)$$

$$= m((-v_1) - v_1)$$

$$\Delta p = -2mv_1$$

$$5. \quad E_K = \frac{mv^2}{2}$$

$$= \frac{m^2v^2}{2m}$$

$$E_K = \frac{p^2}{2m}$$

The momentum of the two players is the same, but the person with the larger mass will have a smaller kinetic energy. It would be better to avoid the faster moving lighter player,  $p_2 = m_2v_2$ .

6. A car crashing into a tree is an example. Momentum is not conserved in the tree-car system because the tree is attached to the earth. The earth supplies a net external force to the system of objects so that momentum is not conserved.

*Teaching Secondary Science* Keith Ross, Liz Lakin, Janet McKechnie, Jim Baker, 2010-02-25 A comprehensive guide to the various aspects of science teaching providing information and ideas about different approaches

*Stochastic Differential Equations for Chemical Transformations in White Noise Probability Space* Don Kulasiri, 2025-01-27 This book highlights the applications of stochastic differential equations in white noise probability space to chemical reactions that occur in biology. These reactions operate in fluctuating environments and are often coupled with each other. The theory of stochastic differential equations based on white noise analysis provides a physically meaningful modelling framework. The Wick product based calculus for stochastic variables is similar to regular calculus therefore there is no need for Ito calculus. Numerical examples are provided with novel ways to solve the equations. While the theory of white noise analysis is well developed by mathematicians over the past decades applications in biophysics do not exist. This book provides a bridge between this kind of mathematics and biophysics.

**Children's Books in Print, 2007** ,2006 Global Optimization Leo Liberti,Nelson Maculan,2006-06-22 Most books about global optimization describe the theory of the algorithms whereas a given implementation s quality never depends

exclusively on the theoretical soundness of the algorithms that are implemented The literature rarely discusses the tuning of algorithmic parameters implementation tricks software architectures and the embedding of local solvers within global solvers And yet there are many good software implementations out there from which the entire community could learn something The scope of this book is moving a few steps toward the systematization of the path that goes from the invention to the implementation and testing of a global optimization algorithm Some of the contributors to the book are famous and some are less well known but all are experts in the discipline of actually getting global optimization to work Thus the papers in this book address the following topics Descriptions of new implementations of general purpose or problem specific global optimization algorithms New algorithms in global optimization some with numerical results and a discussion of the implementation Surveys discussing existing software packages
