Network Culture Politics For The Information Age:

Network Culture Tiziana Terranova,2004-06-20 In an age of email lists and discussion groups e zines and weblogs bringing together users consumers workers and activists from around the globe what kinds of political subjectivity are emerging What kinds of politics become possible in a time of information overload and media saturation What structures of power and control operate over a self organising system like the internet In this highly original new work Tiziana Terranova investigates the political dimension of the network culture in which we now live and explores what the new forms of communication and organisation might mean for our understanding of power and politics Terranova engages with key concepts and debates in cultural theory and cultural politics using examples from media culture computing network dynamics and internet activism within the anti capitalist and anti war movements Network Culture concludes that the nonlinear network dynamics that link different modes of communication at different levels from local radio to satellite television from the national press to the internet from broadcasting to rumours and conspiracy theories provide the conditions within which another politics can emerge This other politics the book suggests does not entail the production of a new political discourse or ideology but the invention of micropolitical tactics able to stand up to new forms of social control

The Promiscuity of Network Culture Robert Payne,2014-12-05 Liking sharing friending going viral what would it mean to recognize these current modes of media interaction as promiscuous In a contemporary network culture characterized by a proliferation of new forms of intimate mediated sociality this book argues that promiscuity is a new standard of user engagement Intimate relations among media users and between users and their media are increasingly structured by an entrepreneurial logic and put to work for the economic interests of media corporations But these multiple

intimacies can also be understood as technologies of promiscuous desire serving both to liberalize mediated social connection and to contain it within normative frames of value Payne brings crucial questions of gender sexuality intimacy and attention back into conversation with recent thinking on network culture and social media identifying the queer undercurrents of these current media dynamics   **Encyclopedia of Social Networks** George A. Barnett,2011-09-07 This handbook systematically introduces readers to the key concepts substantive topics central methods and prime debates   *On and Off the Page* Ari J. Adipurwawidjana,M. B. Hackler,2009-03-26 This collection of essays comprised of research first presented at the seventh annual Louisiana Conference on Literature Language and Culture explores one of the most pervasive vexing and alluring concepts in the Humanities that of place Including essays which encompass a broad range of research fields and methodologies from Geography to Cybernetics it presents a cross section of approaches aimed revealing the complex cultural machinations behind what once may have seemed a static one dimensional topic Investigations into the function of place as a force in contemporary culture inevitably reveal a long history of the interplay between place and cultural product between context and text Just as traditional cultures mythologize sacred spaces so too has Western culture sanctified its own places through its literature Imagined places such as Faulker s Yoknapatawpha or Joyce s Dublin become the focus of conferences and festivals authors homes birthplaces and gravesites are transformed into sites of pilgrimage locales created for television shows and movies become actual businesses catering to a public for whom the line between fantasy and reality is increasingly blurred and persisting through the great cultural shifts of the past two hundred years is the popular and romantic notion that words performances narratives and even national identities are always in some way an expression of the places in which they are created and set With the idea of place foregrounded in so much contemporary discourse this collection promises to enter into an already lively debate and one which due to its relevance to where we live and how we make sense of our own places within them does not show any signs of flagging   *Handbook of Internet Crime* Yvonne Jewkes,Majid Yar,2013-03-07 An essential reference for scholars and others whose work brings them into contact with managing policing and regulating online behaviour the Handbook of Internet Crime emerges at a time of rapid social and technological change Amidst much debate about the dangers presented by the Internet and intensive negotiation over its legitimate uses and regulation this is the most comprehensive and ambitious book on cybercrime to date The Handbook of Internet Crime gathers together the leading scholars in the field to explore issues and debates surrounding internet related crime deviance policing law and regulation in the 21st century The Handbook reflects the range and depth of cybercrime research and scholarship combining contributions from many of those who have established and developed cyber research over the past 25 years and who continue to shape it in its current phase with more recent entrants to the field who are building on this tradition and breaking new ground Contributions reflect both the global nature of cybercrime problems and the international span of scholarship addressing its challenges   Updating to Remain the Same Wendy Hui Kyong

Chun,2017-08-11 What it means when media moves from the new to the habitual when our bodies become archives of supposedly obsolescent media streaming updating sharing saving New media we are told exist at the bleeding edge of obsolescence We thus forever try to catch up updating to remain the same Meanwhile analytic creative and commercial efforts focus exclusively on the next big thing figuring out what will spread and who will spread it the fastest But what do we miss in this constant push to the future In Updating to Remain the Same Wendy Hui Kyong Chun suggests another approach arguing that our media matter most when they seem not to matter at all when they have moved from new to habitual Smart phones for example no longer amaze but they increasingly structure and monitor our lives Through habits Chun says new media become embedded in our lives indeed we become our machines we stream update capture upload link save trash and troll Chun links habits to the rise of networks as the defining concept of our era Networks have been central to the emergence of neoliberalism replacing society with groupings of individuals and connectable YOUS For isn t new media actually NYOU media Habit is central to the inversion of privacy and publicity that drives neoliberalism and networks Why do we view our networked devices as personal when they are so chatty and promiscuous What would happen Chun asks if rather than pushing for privacy that is no privacy we demanded public rights the right to be exposed to take risks and to be in public and not be attacked **Activism on the Web** Veronica Barassi,2015-05-22 Activism on the Web examines the everyday tensions that political activists face as they come to terms with the increasingly commercialized nature of web technologies and sheds light on an important yet under investigated dimension of the relationship between contemporary forms of social protest and internet technologies Drawing on anthropological and ethnographic research amongst three very different political groups in the UK Italy and Spain the book argues that activists everyday internet uses are largely defined by processes of negotiation with digital capitalism These processes of negotiation are giving rise to a series of collective experiences which are defined by the tension between activists democratic needs on one side and the cultural processes reinforced by digital capitalism on the other In looking at the encounter between activist cultures and digital capitalism the book focuses in particular on the tension created by self centered communication processes and networked individualism by corporate surveillance and data mining and by fast capitalism and the temporality of immediacy Activism on the Web suggests that if we want to understand how new technologies are affecting political participation and democratic processes we should not focus on disruption and novelty but we should instead explore the complex dialectics between digital discourses and digital practices between the technical and the social between the political economy of the web and its lived critique Art Platforms and Cultural Production on the Internet Olga Goriunova,2012 In this book Goriunova offers a critical analysis of the processes that produce digital culture Digital cultures thrive on creativity developing new forces of organization to overcome repetition and reach brilliance In order to understand the processes that produce culture the author introduces the concept of the art platform a specific configuration of creative passions codes events individuals and

works that are propelled by cultural currents and maintained through digitally native means Art platforms can occur in numerous contexts bringing about genuinely new cultural production that given enough force come together to sustain an open mechanism while negotiating social technical and political modes of power Software art digital forms of literature 8 bit music 3D art forms pro surfers and networks of geeks are test beds for enquiry into what brings and holds art platforms together Goriunova provides a new means of understanding the development of cultural forms on the Internet placing the phenomenon of participatory and social networks in a conceptual and historical perspective and offering powerful tools for researching cultural phenomena overlooked by other approaches **Networked Affect** Ken Hillis,Susanna Paasonen,Michael Petit,2015-02-27 Investigations of affective experiences that emerge in online settings that range from Facebook discussion forums to smart classrooms Our encounters with websites avatars videos mobile apps discussion forums GIFs and nonhuman intelligent agents allow us to experience sensations of connectivity interest desire and attachment as well as detachment boredom fear and shame Some affective online encounters may arouse complex contradictory feelings that resist dualistic distinctions In this book leading scholars examine the fluctuating and altering dynamics of affect that give shape to online connections and disconnections Doing so they tie issues of circulation and connectivity to theorizations of networked affect Their diverse investigations considering subjects that range from online sexual dynamics to the liveliness of computer code demonstrate the value of affect theories for Internet studies The contributors investigate networked affect in terms of intensity sensation and value They explore online intensities that range from Tumblr practices in LGBTQ communities to visceral reactions to animated avatars examine the affective materiality of software in such platforms as steampunk culture and nonprofit altporn and analyze the ascription of value to online activities including the GTD getting things done movement and the accumulation of personal digital materials Contributors James Ash Alex Cho Jodi Dean Melissa Gregg Ken Hillis Kylie Jarrett Tero Karppi Stephen Maddison Susanna Paasonen Jussi Parikka Michael Petit Jennifer Pybus Jenny Sund n Veronika Tzankova **Digital Media and Political Engagement Worldwide** Eva Anduiza Perea,Michael James Jensen,Laia Jorba,2012-06-29 This book explores how digital media use affects political attitudes and behavior and how this relationship is shaped by political environments across countries While research in this area has concentrated on the United States and United Kingdom such results are set in comparative relief through the analysis of cases across Europe Latin America the Middle East and Asia The book concludes that digital media have an effect on users and depicts some of the characteristics of different political systems that play a significant role for online political engagement **Sonic Agency** Brandon LaBelle,2018 The book proposes a multi dimensional understanding on sound and listening as capacities for challenging social and political structures of inequality and domination supporting interpersonal exchange and modes of community building based on empathy care and compassion *Online Film Production in China Using Blockchain and Smart Contracts* Patrice Poujol,2019-03-04 This book explores the use of Blockchain and smart contract technologies to develop new ways to

finance independent films and digital media worldwide Using case studies of Alibaba and in depth on set observation of a Sino US coproduction as well as research collected from urban China Hong Kong Europe and the USA Online Film Production in China Using Blockchain and Smart Contracts explores new digital platforms and what this means for the international production of creative works This research assesses the change in media consciousness from young urban audiences their emergence as a potential participative and creative community within dis intermediated decentralised and distributed crowdfunding and crowdsourcing models This research proposes solutions on how these young emerging local creative talents can be identified and nurtured early on particularly those who now produce creative and artistic audiovisual content whether these works are related to film Virtual Reality VR video game graphic novels or music Ultimately a new media content finance and production platform implementing blockchain is proposed to bring transparency in the film sector and open doors to emerging artists in digital media Appropriate for both professionals and academics in the film industry as well as computer science **Networked Publics** Kazys Varnelis,2012-08-17 How maturing digital media and network technologies are transforming place culture politics and infrastructure in our everyday life Digital media and network technologies are now part of everyday life The Internet has become the backbone of communication commerce and media the ubiquitous mobile phone connects us with others as it removes us from any stable sense of location Networked Publics examines the ways that the social and cultural shifts created by these technologies have transformed our relationships to and definitions of place culture politics and infrastructure Four chapters each by an interdisciplinary team of scholars using collaborative software provide a synoptic overview along with illustrative case studies The chapter on place describes how digital networks enable us to be present in physical and networked places simultaneously often at the expense of nondigital commitments The chapter on culture explores the growth and impact of amateur produced and remixed content online The chapter on politics examines the new networked modes of bottom up political expression and mobilization And finally the chapter on infrastructure notes the tension between openness and control in the flow of information as seen in the current controversy over net neutrality **A Prehistory of the Cloud** Tung-Hui Hu,2016-09-02 The militarized legacy of the digital cloud how the cloud grew out of older network technologies and politics We may imagine the digital cloud as placeless mute ethereal and unmediated Yet the reality of the cloud is embodied in thousands of massive data centers any one of which can use as much electricity as a midsized town Even all these data centers are only one small part of the cloud Behind that cloud shaped icon on our screens is a whole universe of technologies and cultural norms all working to keep us from noticing their existence In this book Tung Hui Hu examines the gap between the real and the virtual in our understanding of the cloud Hu shows that the cloud grew out of such older networks as railroad tracks sewer lines and television circuits He describes key moments in the prehistory of the cloud from the game Spacewar as exemplar of time sharing computers to Cold War bunkers that were later reused as data centers Countering the popular perception of a new cloudlike political power that is dispersed

and immaterial Hu argues that the cloud grafts digital technologies onto older ways of exerting power over a population But because we invest the cloud with cultural fantasies about security and participation we fail to recognize its militarized origins and ideology Moving between the materiality of the technology itself and its cultural rhetoric Hu s account offers a set of new tools for rethinking the contemporary digital environment **Active Citizen Participation in E-Government: A Global Perspective** Manoharan, Aroon,Holzer, Marc,2012-02-29 This book focuses on the issues and challenges involving adoption and implementation of online civic engagement initiatives globally and will serve as a valuable guide to governments in their efforts to enable active citizen participation Provided by publisher Social Media and Emerging Economies Manlio Del Giudice,Maria Rosaria Della Peruta,Elias G. Carayannis,2013-10-22 How have social media in emerging economies evolved differently from the rest of the world According to studies and anecdotal evidence innovations in the use of social media tools occur more frequently in emerging economies than they do in developed markets The aim of this volume is to show that in emerging regions such as China India and South America where the participation of stakeholders in the circuit of social media is more active i e greater frequency of contacts and creativity in the elaboration of contents organizations not only are involved in a set of exchange relations with other social actors but are also embedded in a network of dynamic relationships The authors utilize social network analysis to determine how entrepreneurs in emerging economies identify their most beneficial social contacts and use those contacts to leverage the resources needed for their enterprises revealing new insights on the process of business creation and economic development in the networked age **Law and Internet Cultures** Kathy Bowrey,2005-05-30 This book raises the profile of socio political questions about the global technology and information market It is a close study of communication flows networks nodes biopolitics and the fragmentations of power It brings to life the role played by personalities corporate interactions industry compromises and the regulatory incompetencies affecting the technological world we all live in US technology powers the internet and disseminates American culture on an unprecedented scale Assessing this power requires an analysis of the diffuse ways that US practice policy and law dominates and a consideration of how influence is negotiated and resisted locally This involves a discussion about how ideas about trade and innovation circulate of the social power of engineers that establish conventions and protocols of the reach of Leviathan corporations and questions about global marketing and consumer tastes For readers interested in intellectual property law information technology cultural studies globalisation and mass communications The World Is Born From Zero Cameron Kunzelman,2022-07-18 The World is Born From Zero is an investigation into the relationship between video games and science fiction through the philosophy of speculation Cameron Kunzelman argues that the video game medium is centered on the evaluation and production of possible futures by following video game studies media philosophy and science fiction studies to their furthest reaches Claiming that the best way to understand games is through rigorous formal analysis of their aesthetic strategies and the cultural context those strategies emerge from Kunzelman investigates a diverse array of games

like The Last of Us VA 11 Hall A and Civilization VI in order to explore what science fiction video games can tell us about their genres their ways of speculating and how the medium of the video game does or does not direct us down experiential pathways that are both oppressive and liberatory Taking a multidisciplinary look at these games The World is Born From Zero offers a unique theorization of science fiction games that provides both science fiction studies and video game studies with new tools for thinking how this medium and mode inform each other **The Laboring of Communication** Vincent Mosco,Catherine McKercher,2009-08-04 This book addresses the changing nature of work workers and their organizations in the media information and knowledge industries It begins with a concise analysis of the meaning of knowledge work and of an information society

web a differential equation is a n equation with a function and one or more of its derivatives example an equation with the function y and its derivative dy dx solving we solve it when we discover the function y or set of functions y there are many tricks to solving differential equations if they can be solved but first why

elementary differential equations william r derrick stanley i - Apr 19 2022

web differential equations are of fundamental importance in the applications of mathematics to the physical and biological sciences this text provides an elementary but cohesive development of the topic the primary goal of the book is to teach students how to use differential equations in applied areas to this end the book includes more than 400

elementary differential equations enhanced etext 11th edition - May 01 2023

web the authors have sought to combine a sound and accurate but not abstract exposition of the elementary theory of differential equations with considerable material on methods of solution analysis and approximation that have proved useful

elementary differential equations by earl d rainville goodreads - May 21 2022

web earl d rainville 4 35 571 ratings43 reviews a clear concise book that emphasizes finding solutions to differential equations where applications play an important role each chapter includes many illustrative examples to assist the reader the book emphasizes methods for finding solutions to differential equations

elementary differential equations trinity university - Sep 05 2023

web learn the basic concepts and methods of elementary differential equations from a free textbook by william trench a professor of mathematics at trinity university the book covers topics such as first order equations linear equations nonlinear

equations laplace transforms numerical methods and more the book also includes exercises solutions

8 1 basics of differential equations mathematics libretexts - Oct 06 2023

web techniques for solving differential equations can take many different forms including direct solution use of graphs or computer calculations we introduce the main ideas in this chapter and describe them in a little more detail later in the course

elementary differential equations 11th edition wiley - Dec 16 2021

web elementary differential equations 11 th edition is written from the viewpoint of the applied mathematician whose interest in differential equations may sometimes be quite theoretical sometimes intensely practical and often somewhere in between
