**Rethinking Culture and Creativity in the Digital Transformation** Luciana Lazzeretti, Stefania Oliva, Niccolò Innocenti, Francesco Capone, 2023-03-31 This book discusses the role of digital technologies in the growth and development of cultural organizations and the creative sector. It includes contributions by authoritative scholars who address this topic through different perspectives, methodologies and approaches. The first part of the volume focusses on theoretical contributions that identify the main transformations caused by the digital revolution, the use of data, outlining new possible analytic frameworks and future lines of research. The second part of the volume presents empirical contributions applied to different fields in the study of the cultural and creative sectors. These range from analyses of traditional cultural organizations such as museums, the evolution of trajectories in the fashion industry, techno creative communities, digital services for tourism to cultural and creative industries and wealth and creative work. This edited volume will be of great value to scholars in the fields of Economics and Management, including Economic Geography and Economic Development. Students and researchers interested in learning more about new technologies and their impact on cultural and creative sectors will also benefit from this book. This book was originally published as a special issue of *European Planning Studies*. **AF Manual** United States. Department of the Air Force, 1956 **Handbook on Alternative Theories of Innovation** Godin, Benoît, Gaglio, Gérald, Vinck, Dominique, 2021-10-12 This insightful Handbook scrutinizes alternative concepts and approaches to the dominant economic or industrial theories of innovation. Providing an assessment of these alternatives, it questions the absence of these neglected types of innovation and suggests diverse theories. **Hidden Innovation** Stuart Cunningham, 2013 Because of the divergence in world views and methods between scientists and the creative sector, innovation systems and policies have focused for decades on science, engineering, technology and medicine. The humanities, arts and social sciences have had their contributions hidden from research agendas, policy and program initiatives and the public mind. But structural changes to advanced economies and societies have brought service industries and the creative sector to greater prominence as key contributors to innovation. *Hidden Innovation* peels back the veil, tracing the way innovation occurs through new forms of screen production enabled by social media platforms as well as in public broadcasting. It shows that creative workers are contributing fresh ideas across the economy and traces how policies are beginning to catch up with the changing social and economic realities on a global level. *Hidden Innovations* argues that the innovation framework offers the best opportunity in decades to reassess the case for the public role of the humanities, particularly the media and cultural and communication studies. **A Research Agenda for Creative Industries** Stuart Cunningham, Terry Flew, Interdisciplinary, internationally focused, policy informed and strategic, this book sets out agendas for advancing research into creative industries as a productive and innovative intervention in public policy. With contributions from leading scholars, policy and industry specialists, this *Research Agenda* will be a vital resource for students and

academics working in the fields of communication culture film and media geography business and policy studies and Internet and social media studies

**FOTOGRAFIA DIGITAL** JOSE RAMALHO, Universities, Inclusive Development and Social Innovation Claes Brundenius, Bo Göransson, José Manoel Carvalho de Mello, 2016-10-25 This book examines the ways in which universities can play a crucial role in inclusive development, social innovation and social entrepreneurship. It aims to prove the importance of inclusive development and inclusive innovation on economic growth and demonstrate the ways in which universities can be pioneers in this area through initiatives in social responsibility and social innovation. For example, providing access to a university education without discrimination of race, gender, income status or other factors would help to diminish the increasing income differentials currently being experienced in many countries, especially in the developing world. The research and studies included in this book provide insight into possible actions that can be taken by universities and public and private shareholders in inclusive development, social innovation, social entrepreneurship and overall regional economic and social development. Innovation is currently considered to be the most important and dynamic factor explaining growth and development. At the same time, the traditional view considering innovation as having to be commercialized at any price is being challenged. Lately, there has been growing interest in innovation in the public sector, particularly with respect to social innovations designed to reduce income inequality. To address these concepts, constant exchange of ideas and information between research groups became necessary. UniDev: Universities in Development: the Evolving Role of Academic Institutions.
