Figure 9

### Blade Control Handle

The blade control handle is located on the upper handle of the mower. See Figure 9. The blade control handle must be depressed in order to operate the unit. Release the blade control handle to stop the engine and blade.

### Drive Control Lever

Squeezing the drive control lever engages the drive system. Releasing the clutch control disengages the drive system. Release the clutch control to slow down when negotiating an obstacle, making a turn or stopping.

### Shift Lever

The shift lever is located on the drive control housing on the upper handle. See Figure 9. This lever is used to select the forward speed of the mower. When changing your speed selection, release the drive clutch control.

### Mulching Plug

The mulching plug is used to close the side-discharge chute opening when mulching or bagging grass. Do not remove the hinged mulching plug at any time, even when you are not mulching.

### Recoil Starter

The recoil starter is attached to the right upper handle. Stand behind the unit and pull the recoil starter rope to start the unit.

### Cutting Height Adjustment Lever

The height adjuster determines the cutting height of the mower. The adjuster is located above the left rear wheel.

### Before Starting

1. Service the engine with gasoline and oil as instructed in the separate engine manual.
2. Attach spark plug wire to spark plug. If unit is equipped with a rubber boot over the end of the spark plug wire, make certain the metal loop on the end of the spark plug wire (inside the rubber boot) is fastened securely over the metal tip on the spark plug.
3. Before each use, check for proper drive clutch operation by performing the following before starting the engine:
  - a. With the drive control released, push mower forward. It should move freely. Pull mower backward. It should move with only a small amount of resistance.
  - b. If it does not the clutch may not be releasing completely. Do not start the engine until corrections have been made. Check the control cable for severe bend, links and binding. Also check for grass build-up around the belt.
