Medieval Europe From Another Angle Florin Curta,2025-05-29 While the Middle Ages represent a topic of perennial interest most studies have addressed the western parts of the European continent often from the angle of the written sources This volume examines an area less

known in the literary and archaeological evidence The studies included therein provide significant insights into the history and archaeology of East Central and Eastern Europe during Late Antiquity and the early Middle Ages This is the first volume of essays explicitly to reassess the significance of the region as well as the role of the archaeological evidence in studying ethnicity in the Middle Ages particularly in the case of the Slavs and the Avars Because of its geographic chronological thematic and methodological scope this book offers a new perspective from a different angle on the analysis of the archaeological and written sources Some chapters focus on settlement sites others discuss artifacts from burial assemblages As well as advancing new models for the analysis of the written sources in relation to ethnicity Medieval Europe from Another Angle offers new approaches to the understanding of how ethnicity may have been constructed in the Middle Ages in material culture terms It will appeal to scholars and students alike studying Late Antiquity and the early Middle Ages with an interest in material culture and its use in building ethnic boundaries

origins to the nuclear age it compels us to widen our narrow perspectives on conflicts and strategic action and open ourselves up to the universal from the Foreword

Warfare in the Global Middle Ages David S. Bachrach, Bernard S. Bachrach, 2025-09-30 War preparation for war and dealing with war's aftermath consumed the greater part of the surplus resources of societies around the globe throughout the pre modern period Military matters affected men women and children alike as direct participants in organized violence as the victims of conflicts or through broad based impositions on ostensibly civilian populations in cash kind and labor Warfare in the Global Middle Ages illuminates the organization and conduct of war as well as the impact of warfare on societies in Europe Asia Africa and the Americas across a long millennium spanning from the third century CE to the sixteenth century CE The volume is organized in eight chapters which address the current state of scholarship regarding warfare over this long period the source materials available to scholars to investigate the myriad questions related to this broad field and the institutions developed by societies to defend themselves and engage in wars of conquest military technology the logistics of war the education and training of military leaders and individual combatants as well as strategy military intelligence and diplomacy The authors argue that an analysis of these topics illuminates broad similarities among polities across the globe the transmission of ideas and technologies on a regional and global level and also important differences in the ways that societies responded to similar challenges This work is intended broadly both for specialists in the history of warfare across the globe for an interested lay public as well as for use in the classroom

The Eurasian Way of War David A. Graff, 2016-03-10 This book is a comparative study of military practice in Sui Tang China and the Byzantine Empire between approximately 600 and 700 CE It covers all aspects of the military art from weapons and battlefield tactics to logistics campaign organization military institutions and the grand strategy of empire Whilst not neglecting the many differences between the Chinese and Byzantines this book highlights the striking similarities in their organizational structures tactical deployments and above all their extremely cautious approach to warfare It shows that contrary to the conventional wisdom positing a straightforward Western way of war and an Oriental approach characterized by evasion and trickery the specifics of Byzantine military practice in the seventh century differed very little from what was known in Tang China It argues that these similarities cannot be explained by diffusion or shared cultural influences which were limited but instead by the need to deal with common problems and confront common enemies in particular the nomadic peoples of the Eurasian steppes Overall this book provides compelling evidence that pragmatic needs may have more influence than deep cultural imperatives in determining a society's way of war
