

VARIABLES AND PATTERNS

INVESTIGATION 1 NOTES

variable – a quantity that changes or varies. (It is represented by a letter.)

coordinate graph – a graph that displays data, by showing how two variables relate.

relationship – how one variable compares to the other.

y-axis – the vertical axis (going up and down).

x-axis – the horizontal axis (going left to right).

dependent variable – the variable that depends on the other, and you have control of this variable. The dependent variable goes on the y-axis.

independent variable – the variable that the other depends on, and you have NO control of this variable. The independent variable goes on the x-axis. (Any form of TIME goes on the x-axis.)

scale – the numbers you count by on the x and y-axis.

coordinate pair – the point on a graph where the x-value and y-value intersect. The first number is the x-coordinate, and the second number is the y-coordinate.

relationship – how two or more variables relate to each other. If one variable changes, the other variable must also change, and the change may be predictable.

Physical Processes in Red Giants I. Iben,Alvio Renzini,2012-12-06 In recent years it has become clear that the red giant phase is one of the most dramatic periods in a star's life when all of its parts become involved in ways that have both direct and indirect observational consequences This is most particularly true of low and intermediate mass stars during the second ascent of the giant branch Such stars bring to their surfaces products of nucleosynthesis currently taking place in their deep interiors they pulsate as Mira variables develop extended outward flowing atmospheres that may exhibit maser properties and shed great quantities of matter sometimes highly processed into the inter stellar medium The manner in which processed matter is brought to the surface is far from being completely explained and the precise mechanism or mechanisms whereby matter is ejected from the stellar surface whether by deposition of Alfvén waves radiation pressure on grains or as a consequence of some large scale envelope instability has yet to be elucidated to everyone's satisfaction The purpose of the second workshop in Astrophysics organized by the Advanced School of Astronomy was to bring together experts on all the physical processes occurring in red giants in an effort to emphasize the interrelatedness of these individual processes and to encourage a dialogue among experts that might serve to initiate a synthesis or at least sharpen our understanding of the most important problems to address in the future
