Creating the New African University, 2023-05-25 *Creating the New African University* grapples with the existence of African universities particularly in post independent Africa where Higher Education Institutions HEIs are supposed to live up to the expectations of being adaptive in dealing with prevalent complex dynamic contemporary and future challenges facing African societies The book tackles the issue of what ought to be done for African universities to maintain a structure and identity that ensures their relevance in Africa's development through generating and transforming knowledge into actions for the common good It engages issues within the context of how post colonial transformative obligations have been managed in light of the prevalent epistemological and pedagogical underpinnings that form the foundations of these universities as they seek to break from the clutches of colonial legacies This book further highlights an urgent need to do away with silos and embrace a multidisciplinary interdisciplinary transdisciplinary and cross disciplinary dialogical approach towards knowledge generation Such an approach is essential in efforts aimed at enhancing the sustainable reconfiguration of university structures and functions whilst linking knowledge produced to diverse social economic and political facets of African societies in ways that promote and sustain competitiveness in a rapidly globalising world beset with technological advancements

Discrimination in an Unequal World Miguel Angel Centeno, Katherine S. Newman, 2010-09 Is globalization making our world more equal or less Proponents of globalization argue that it is helping and that in a competitive world no one can afford to discriminate except on the basis of skills Opponents counter that globalization does nothing but provide a meritocratic patina on a consistently unequal distribution of opportunity Yet despite the often deafening volume of the debate there is surprisingly little empirical work available on the extent to which the process of globalization over the past quarter century has had any effect on discrimination Tackling this challenge *Discrimination in an Unequal World* explores the

relationship between discrimination and unequal outcomes in the appropriate geographical and historical context Noting how each society tends to see its particular version of discrimination as universal and obvious the editors expand their set of cases to include a broad variety of social relations and practices However since methods differ and are often designed for particular national circumstances they set the much more ambitious and practical goal of establishing a base with which different forms of discrimination across the world can be compared Derived from a broad array of methods the book draws many important lessons on the new means by which the world creates social hierarchies the democratization of inequality and the disappearance of traditional categories
