The Pattern Of The Chinese Past:

The Pattern of the Chinese Past Mark Elvin, 1973 A satisfactory comprehensive history of the social and economic development of pre modern China the largest country in the world in terms of population and with a documentary record covering three millennia is still far from possible The present work is only an attempt to disengage the major themes that seem to be of relevance to our understanding of China today In particular this volume studies three questions Why did the Chinese Empire stay together when the Roman Empire and every other empire of antiquity of the middle ages ultimately collapsed What were the causes of the medieval revolution which made the Chinese economy after about 1100 the most advanced in the world And why did China after about 1350 fail to maintain her earlier pace of technological advance while still in many respects advancing economically The three sections of the book deal with these problems in turn but the division of a subject matter is to some extent only one of convenience These topics are so interrelated that in the last analysis none of them can be considered in isolation from the others

China's Cosmopolitan Empire Mark Edward Lewis, 2009-06-30 The Tang dynasty is often called China's golden age a period of commercial religious and cultural connections from Korea and Japan to the Persian Gulf and a time of unsurpassed literary creativity Mark Lewis captures a dynamic era in which the empire reached its greatest geographical extent under Chinese rule painting and ceramic arts flourished women played a major role both as rulers and in the economy and China produced its finest lyric poets in Wang Wei Li Bo and Du Fu The Chinese engaged in extensive trade on sea and land Merchants from Inner Asia settled in the capital while Chinese entrepreneurs set off for the wider world the beginning of a global diaspora The emergence of an economically and culturally dominant south that was controlled from a northern capital set a pattern for the rest of Chinese imperial history Poems celebrated the glories of the capital meditated on individual loneliness in its midst and described heroic young men and beautiful women who filled city streets and bars Despite the romantic aura attached to the Tang it was not a time of unending peace In 756 General An Lushan led a revolt that shook the country to its core weakening the government to such a degree that by the early tenth century regional warlordism gripped many areas heralding the decline of the Great Tang

China's Last Empire William T. Rowe, 2012-09-10 In a brisk revisionist history William Rowe challenges the standard narrative of Qing China as a decadent inward looking state that failed to keep pace with the modern West This original thought provoking history of China's last empire is a must read for understanding the challenges facing China today

Technology, Gender and History in Imperial China Francesca Bray, 2013-06-19 What can the history of technology contribute to our understanding of late imperial China Most stories about technology in pre modern China follow a well worn plot in about 1400 after an early ferment of creativity that made it the most technologically sophisticated civilisation in the world China entered an era of technical lethargy and decline But how are we to reconcile this tale which portrays China in the Ming and Qing dynasties as a dying giant that had outgrown its own strength with the wealth of counterevidence affirming that the country remained rich vigorous and powerful at least until the end of the eighteenth century Does this seeming contradiction mean that the stagnation story is simply wrong or perhaps that technology was irrelevant to how imperial society worked Or does it imply that historians of technology should ask better questions about what technology was what it did and what it meant in pre modern societies like late imperial China In this book Francesca Bray explores subjects such as technology and ethics technology and gendered subjectivities both female and male and technology and statecraft to illuminate how material settings and practices shaped topographies of everyday experience and ideologies of government techniques of the self and technologies of the subject Examining technologies ranging from ploughing and weaving to drawing pictures building a house prescribing medicine or composing a text this book offers a rich insight into the interplay between the micro and macro politics of everyday life and the workings of governmentality in late imperial China showing that gender principles were woven into the very fabric of empire from cosmology and ideologies of rule to the material foundations of the state and the everyday practices of the domestic sphere This authoritative text will be welcomed by students and scholars of Chinese history as well as those working on global history and the histories of gender technology and agriculture Furthermore it will be of great use to those interested in social and cultural anthropology and material culture

Modern China I. W. Mabbett, 2024-11-01 Most writing on modern China dwells on those aspects which are new to China since the Communist takeover stressing above all politics Marxism economic and agricultural development First published in 1985

Modern China argues that all this writing creates a false impression of what present day China is really like This book contends that much of traditional China remains particularly at the grass roots level and that Buddhism and the Buddhist tradition continue to exert an influence Politics in communist China is best understood in the context of this tradition Throughout arguments are supported by revealing how tradition continues in the economy in society and the family by examining in detail the Buddhist tradition and by using the case study of education to show the interplay between modern and customary forces
