the agglutinated nucleus whose ambiguity tends to blunt persecutory situations The psychoanalytic setting functions as a silent refuge for the psychotic part of the personality where it creates a phantom world At some point therefore the setting itself has to be analysed and the analytic relationship de symbiotised as Bleger observes in a celebrated chapter on the setting Jos Bleger s work demonstrates the need to analyse early narcissistic object relations as they arise clinically especially in the setting More widely he regards undifferentiation and participation as operating throughout life in groups institutions and society as a whole
