Edwards, Dorothy J. Dankel, 2016-02-26 A key goal of fisheries management is to regulate extractive pressure on a resource so as to ensure social economic and ecological sustainability This text provides an accessible entry point for students and professionals to management science as developed in fisheries in order to facilitate uptake of the latest ideas and methods Traditional management approaches have relied upon a stock assessment based on existing understanding of resource status and dynamics and a prediction of the likely future response to a static management proposal However all such predictions include an inherent degree of uncertainty and the last few decades have seen the emergence of an adaptive approach that uses feedback control to account for unknown future behaviour Feedback is achieved via a control rule which defines a relationship between perceived status of the resource and a management action Evaluations of such rules usually include computer simulation testing across a broad range of uncertainties so that an appropriate and robust rule can be selected by stakeholders and managers The book focuses on this approach which is usually referred to as Management Strategy Evaluation The book is enriched by case study examples from different parts of the world as well as insights into the theory and practice from those actively involved in the science of fisheries management The Broken Walls of Jerusalem and the Rebuilding of Them Susan Warner, 1885

Chinese society from 1945 to 1965 By employing a wide range of primary materials that have been rarely used before the authors have demonstrated the multi dimensionality and complexity of the Chinese society in postwar Singapore which was full of vitality and politically active They argue that the combination of the internal dynamism and the changing socio political framework shaped the nature and characteristics of the Chinese community and its fundamental role in the making of modern Singapore This study is essential reading for an understanding of not only the Chinese politics and business networks in postwar Singapore but also the historical evolution of the newly independent Republic The Status of US Fisheries 1997-2013 Jonah Young, This book is a collection of annual reports on the status of US Fisheries to Congress for the period of 1997 2013 written by NOAA Fisheries http www nmfs noaa gov
