# The Power of Critical Thinking

Effective Reasoning About  
Ordinary and Extraordinary Claims

The background of the cover is a surreal landscape at dusk or dawn. The sky is a gradient of deep blue and purple. In the foreground, there is a sandy, flat ground. Three classical-style doorways are visible. The central doorway is brightly lit from within, showing a bright blue sky with white clouds. To its right is another doorway, also lit from within, showing a similar bright light. To the left, there is a third, smaller doorway that is dark and unlit. The overall mood is one of mystery and enlightenment.

### *The Ethics of Canine Care*

Craig Banks Merow, 2023-06-21 The social status of dogs has changed dramatically in the past 75 years Today most dog owners and small animal veterinarians consider companion canines to be members of their families and communities However the attitudes of some dog owners concerning their responsibilities to their dogs and many of the laws that regulate dog ownership and veterinary medical practice largely reflect the human canine relationship and ethical norms of an earlier era This incongruity leads to unmet needs for companion canines and high levels of stress for many veterinary clinicians This book presents arguments for human responsibilities to companion canines a detailed analysis of what those responsibilities entail and the professional ethical standards and laws needed to ensure that responsibilities are met A new moral framework the Custodial Property Framework is created for the care and medical treatment of companion canines and is grounded in a detailed analysis of the responsibilities of care generated by the relationship we have with our best friends

Wagner, Daphne Johnson, Frank Fair, Daniel Fasko Jr., 2016-12-07 In the wake of initiatives such as No Child Left Behind and the use of high stakes testing the emphasis in schools has been on drill and practice for the test Genuine understanding and critical thinking have been increasingly shortchanged As a result students have fewer opportunities to advance their insight into cognitive and emotional challenges even though both teachers and parents recognize the importance of developing deliberative and reflective thinking skills This book uniquely combines two things First it provides resources for classroom teachers in grades 3-6 that make it possible for them at a moment's notice to take advantage of a teachable moment by drawing students into productive intellectual discussions Second it gives the reader an overview of the rationale and the research base for engaging students in educational activities that are truly intellectual and that are not limited to training for testing success
