Clinical Psychology* K. Drorit Gaines,Henry V. Soper,2019-11-25 When individuals from other cultures have psychological  
difficulties it is obvious that any therapy should be done with that cultural background in mind First and foremost this client  
will need to return to that culture and have to function successfully within it This means that the therapist should try to see  
the world through the eyes of this person s culture and understand what makes sense to him or her In practice however this  
is easier said than done As Arthur MacNeill Horton writes in the foreword to this book Definitions of culture are like  
toothbrushes everyone has one but no one wishes to use another s This volume tries to address this quandary by approaching  
the hidden cultures in psychotherapy from several different directions The first section of this book looks at the most  
prominent phenomena that the therapist is likely to encounter including gender based bias transgender bias or racial  
prejudice Other chapters look at cultures where sensitivity is less obvious such as those who are aging have disabilities or  
belong to a specific religious group such as the many strands within Judaism The second section of this book goes deeper by  
grappling with specific case studies and first person accounts Here we meet witnesses who as ethnic Japanese suffered from  
internment during the Second World War people who experienced prejudice and misunderstanding as members of First  
Nations Peoples and Hispanics who struggle with acculturation in the United States Each of these chapters serves as an  
example of what one person views as his or her culture and how this relates to effective therapy The essential message of the  
book is that while every client is unique the therapist should try to develop a sensitivity to these unique cultural indicators  
that may play a crucial role in the healing process      *Psychotherapy and Culture* Zack Eleftheriadou,2018-05-08 this book  
focuses on cross cultural relationships and examines how culture and racial factors manifest in the clinical setting It  
discusses on how to work with both cross cultural differentiation and integration
